Ever since its original publication in Germany in 1938, Max Schweidler's Die Instandsetzung von Kupferstichen, Zeichnungen, Buchern usw. has been recognized as a seminal modern text on the conservation and restoration of works on paper. This volume, based on the authoritative revised German edition of 1950, makes Schweidler's work available in English for the first time, in a meticulously edited and annotated scholarly edition. An extensively illustrated appendix presents case studies of eleven Old Master prints that were treated using the techniques Schweidler discusses.

The fourteen articles in this volume bring together some of the latest research on the cultural, intellectual and commercial interactions during the Renaissance between Western Europe and the Middle East, with particular reference to the Ottoman Empire. The articles contribute to an exciting cross-cultural and inter-disciplinary scholarly dialogue that explores elements of continuity and exchange between the two areas, and positions the Ottoman Empire as an integral element of the geo-political and cultural continuum within which the Renaissance evolved.

Monasticism was the dominant form of religious life both in the medieval West and in the Byzantine world. Latin and Greek Monasticism in the Crusader States explores the parallel histories of monasticism in western and Byzantine traditions in the Near East in the period c.1050-1300. Bernard Hamilton and Andrew Jotischky follow the parallel histories of new Latin foundations alongside the survival and revival of Greek Orthodox monastic life under Crusader rule. Examining the involvement of monasteries in the newly founded Crusader States, the institutional organization of monasteries, the role of monastic life in shaping expressions of piety, and the literary and cultural products of monasteries, this meticulously researched survey will facilitate a new understanding of indigenous religious institutions and culture in the Crusader states.

Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, The Mushroom at the End of the World follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, The Mushroom at the End of the World presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.
