ACDelco Spark Plug | Sparkplugguide

The term heat range refers to the speed with which a plug can transfer heat from the combustion chamber to the engine head. Whether the plug is to be installed in a boat, lawnmower or race car, it has been found the optimum combustion chamber temperature for gasoline engines is between 500°C-850°C. Within that range it is cool enough to avoid pre-ignition and plug tip overheating (which can cause engine damage), while still hot enough to burn off combustion deposits that cause fouling.

---

ACDelco | Spark Plugs

These spark plugs are made with a pure copper core that results in a cooler electrode temperature for maximized durability and fouling resistance.

---

Auto Parts: Spark Plugs and Glow Plugs | ACDelco

Insulator tip temperature is influenced by the proper choice of spark plug heat range. One heat range changes the spark plug insulator tip temperature by about 75 - 100 degree Celsius. A. Too cold spark plug for a given engine. B. Suitable spark plug for a given engine. C. Too hot spark plug for a given engine.

---

Spark Plug Cross Reference HEAT RANGE CHART

Features & Benefits. Has a copper-core center electrode that helps provide improved heat transfer from the tip, giving you the reliability you're looking for while providing better performance in most operating conditions\*. Precisely engineered and manufactured to provide everyday reliability and efficient performance. The copper-core center electrode allows for a longer insulator tip length for a given heat range, which helps prevent low-speed carbon fouling.
