Aluminum: Technology ...

Aluminum is not only a great material because it's lightweight and conducts heat well, it can also be recycled indefinitely (if uncontaminated).

There's still a lot of aluminum lost to landfills, which can be improved by post-consumer recycling. Did you know that if you wash off your aluminum foil it can also be easily recycled? Recycle all your aluminum!

Aluminum is necessary in
construction. The metal is used in
practically all elements: skylights,
building bridges, shutters, ladders and
railings. The element is present in
rods, doors, stampings, wiring, bars,
tubing, sheets, pipes, casting and
scraps. Aluminum is applied in a wide
array of industrial applications.
