Army Combat Engineer (MOS 12B): 2020 Career Profile

A combat engineer is a type of soldier who performs military engineering tasks in support of land forces combat operations. Combat engineers perform a variety of military engineering, mining, construction and demolition tasks under combat conditions. The combat engineer's goals involve facilitating movement and support of friendly forces while impeding those of the enemy. Combat engineers build fighting positions, fortifications, and roads. They conduct demolitions missions and clear minefields

Combat engineer - Wikipedia

A sapper, also called pioneer or combat engineer, is a combatant or soldier who performs a variety of military engineering duties such as breaching fortifications, demolitions, bridge-building, laying or clearing minefields, preparing field defenses, as well as working on road and airfield construction and repair.They are also trained to serve as infantry personnel in defensive and offensive ...

Sapper - Wikipedia

This is a list of current formations of the United States Army, which is constantly changing as the Army changes its structure over time. Due to the nature of those changes, specifically the restructuring of brigades into autonomous modular brigades, debate has arisen as to whether brigades are units or formations; for the purposes of this list, brigades are currently excluded.

List of current formations of the United States Army...

A Combat Engineer (Sapper tabbed) are front-line infantry support troops that "Clear the Way." They are trained as infantrymen, and some combat engineering units have a secondary role as infantry as well.
