The story of a boy who lives with twelve older brothers in an orphanage.

Seducing the Single Mom Widowed mom Sofia Bingham needs a job—fast! Her babies won't feed themselves. Working for real estate tycoon Eric Jenner is the perfect solution. But her childhood buddy is all grown up now...and tempting as hell. Surely one unforgettable night of passion wouldn't hurt? After that, they can go back to being all business! But Eric doesn't agree that they should put their red-hot romance on ice. He can't deny his connection to Sofia's adorable twins—or his consuming desire for their mother. What will it take to convince her that he's playing for keeps?

For one semester MBA Managerial Economics courses Economics for Managers presents the fundamental ideas of microeconomics and macroeconomics and integrates them from a managerial decision-making perspective in a framework that can be used in a single-semester course. To be competitive in today's business environment, managers must understand how economic forces affect their business and the factors that must be considered when making business decisions. This is the only book that provides business students and MBAs with a thorough and applied understanding of both micro- and macroeconomic concepts in a way non-economics majors can understand. The third edition retains all the same core concepts and straightforward material on micro- and macroeconomics while incorporating new case material and real-world examples that relate to today's managerial student.

Differential Topology provides an elementary and intuitive introduction to the study of smooth manifolds. In the years since its first publication, Guillemin and Pollack's book has become a standard text on the subject. It is a jewel of mathematical exposition, judiciously picking exactly the right mixture of detail and generality to display the richness within. The text is mostly self-contained, requiring only undergraduate analysis and linear algebra. By relying on a unifying idea—transversality—the authors are able to avoid the use of big machinery or ad hoc techniques to establish the main results. In this way, they present intelligent treatments of important theorems, such as the Lefschetz fixed-point theorem, the Poincaré-Hopf index theorem, and Stokes theorem. The book has a wealth of exercises of various types. Some are routine explorations of the main material. In others, the students are guided step-by-step through proofs of fundamental results, such as the Jordan-Brouwer separation theorem. An exercise section in Chapter 4 leads the student through a construction of de Rham cohomology and a proof of its homotopy invariance. The book is suitable for either an introductory graduate course or an advanced undergraduate course.

Never Talk Back to a Gangster Part 2 by Alesana Marie Muli kong naalala kung ano ang naramdaman ko sa kanya, sa halik niya. Kung gaano ako kasaya nang mga sandaling 'yon at kung gaano kaperpekto ang oras na 'yon para sa akin. Kaya naman nakapag-desisyon na ako. Alam ko na mahihirapan ako sa hinaharap pero ayokong isuko ang pagmamahal ko para sa taong una kong minahal simula palang. Kung hindi ko gagawin'to, baka sa hinaharap mag-sisi ako at tanungin ko ang sarili ko kung bakit pinagbawalan ko ang sarili ko? Palagi kong tatanungin kung ano ang mangyayari kung sakali na hinayaan ko ang sarili ko na mahulog din sa kanya. Isa itong makasariling desisyon, alam ko. Pero gusto ko siyang mahal. Gustong-gusto kong mahal siya kahit na mali pa. Published by Psicom Publishing Inc.
