"The book is extremely well balanced: in each section there is usually an argument for and against the positions raised. It is a useful and well-thought-out text. It will make people think and discuss the problems raised, which I think is the editor's main purpose." -- Journal of Medical Ethics "... a volume that is to be commended for the clarity of its contributions, and for the depth it gains from its narrow focus. In places, this is a deeply moving, as well as closely argued, book." -- Times Literary Supplement "This work is an excellent historical and philosophical resource on a very difficult subject." -- Choice "This collection of well-written and carefully argued essays should be interesting, illuminating, and thought provoking for students, clinicians, and scholars." -- New England Journal of Medicine "This book is highly recommended..." -- Pharmacy Book Review "This is a well-balanced collection and the essays are of uniformly good quality.... very readable.... should be useful to anyone interested in this topic." -- Doody's Health Sciences Book Review Home Page "Physician-Assisted Suicide continues in the fine tradition of the Medical Ethics series published by Indiana University Press. Chapters are authored by outstanding scholars from both sides of the debate, providing a balanced, in-depth exploration of physician-assisted suicide along clinical, ethical, historical, and public policy dimensions. It is important reading for those who want to better understand the complex, multilayered

issues that underlie this emotionally-laden topic." -- Timothy Quill, M.D. "Robert Weir has produced the finest collection of essays on physician assisted dying yet assembled in one volume. Physician assisted dying involves ethical and legal issues of enormous complexity. The deep strength of this anthology is its multi-disciplinary approach, which insightfully brings to bear interpretations from history, moral philosophy, religion, clinical practice, and law. This is a subject, much like abortion, that has divided America. This volume provides balanced scholarship that will help inform opinions from the hospital and hospice bedside to the halls of federal and state legislatures and courtrooms." -- Lawrence O. Gostin, Co-Director, Georgetown/Johns Hopkins Program on Law and Public Health "This book is a timely and valuable contribution to the debate. Highly recommended for academic collections." -- Library Journal These essays shed light and perspective on today's hotly contested issue of physician-assisted suicide. The authors were selected not only because of their experience and scholarship, but also because they provide readers with differing points of view on this complex subject -- and a potential moral quandary for us all.

From moral and ethical viewpoints, Kohl examines abortion, euthanasia, the principles of sanctity-of-life, and the nature and problems of justifiable killing

"In this revision of his already classic text, William May shows us once again the wisdom of the Catholic Church's moral tradition in its application to contemporary bioethics.

Illuminating and engaging - and with the attention to nuance that marks all of May's writing." - Edward J. Furton, M.A., Ph.D., Ethicist and Director of Publications, The National Catholic Bioethics Center "Since it was first published, Dr. May's text *Catholic Bioethics and the Gift of Human Life* has served an irreplaceable role in Catholic moral education. His new revision adds clear systematic treatments of several additional issues of pressing moral concern to the Church and society. Catholic educators everywhere will welcome this excellent revision. I welcome it! - E. Christian Brugger, Associate Professor of Moral Theology, Institute for the Psychological Sciences "With so much bioethical thinking supporting the 'culture of death,' I can think of no better champion of a 'culture of life' than Professor William E. May. Professor May has given us a book which is useful not only for its masterful summary of the moral magisterium on bioethics, but also for its treatment of such issues as contraception, artificial reproduction, the care of the dying, human experimentation, and the definition of death and organ transplants." - Dr. Mark S. Latkovic, Associate Professor of Moral Theology, Sacred Heart Major Seminary What the Church teaches - and why - on issues of euthanasia, in vitro fertilization, genetic counseling, assisted suicide, living wills, persistent vegetative state, organ transplants, and more.
