The first step in reanimating my broken Brother KH-950i knitting machine with the Knitic system is understanding the principles of how Brother electronic knitting machines work. Fortunately the KH-910 and KH-940 service manuals (both downloadable from Knitting Machines etc.) are really useful in this regard.

Electronic Knitting Machines Kh 910. This is a standard gauge knitting machine with 60 stitch pattern mechanism over 200 needle bed. This was the first electronic knitting machine made by Brother so there were few faults with this machine. Major one being the electronic short circuiting. These machines came with mylar sheet reading mechanism ...

Models of Brother Knitting Machines - machine4u  
Brother knitting machines use an electronic accessory known as 'Garter Carriage' which has single internally mounted needle which faces those on the central bed, so when a stitch is picked via the patterning mechanism, the needle lifts up the wanted stitch of its needle. It creates the stitch through the back while making a puri stitch on the front of the material. You can use different ...
