clockwise contracts  
energy and moves  
figuratively down  
the dimensional  
ladder.

## Platonic Solids From Paper Or Cardboard And

How to Use the  
Platonic Solids for  
Personal Growth...

There are a number  
of rules that apply  
to Platonic Solids:

1. The faces of  
each Platonic Solid

# Online Library Building

are all identical  
regular polygons. 2.

At each vertex or  
corner at least  
three faces or more  
must meet. Note :

Two polygons do  
not build a solid  
angle. 3. When you  
add up the internal  
angles that meet at

...

### Platonic Solids -

# Online Library Building

## Millennium Solids Education

To explain this, we'll have to take a look at a dimension lower, 2D instead of 3D. Every Platonic Solid (and Archimedean Solid) is built out of regular polygons. This basically means that each edge is equal and

# Online Library Building

each corner of the  
2D shape is equal.  
The most basic  
regular polygon is a  
regular triangle.

Constructing Solids

POLYHEDRA -

Framework

Montessori

In three-Platonic

dimensional space,

a Platonic solid is a

regular, convex

polyhedron. It is

constructed by

congruent, regular,

polygonal faces

with the same

number of faces

# Online Library Building

meeting at each  
vertex. Five solids  
meet these criteria:  
Tetrahedron Cube  
Octahedron  
Dodecahedron  
Icosahedron Four  
faces Six faces  
Eight faces Twelve  
faces Twenty faces  
Geometers have  
studied the Platonic  
solids for thousands  
of years. They are

# Online Library Building

named for the  
ancient Greek  
philosopher Plato  
who hypothesized  
in one of his  
dialogues, th

Platonic solid -

Wikipedia

As such the  
buildings (solid  
objects) have a  
defined form, like  
little boxes. They

# Online Library Building

are platonic solids.  
But when such  
buildings are placed  
close enough to  
each other an  
inevitable result  
happens – the  
spaces between the  
buildings begin to  
develop a  
character; a shape  
of their own.

## Ethereal Matters

Architecture can be described as the practice of

combining and rearranging platonic solids to create an attractive and

usable space. Up until recently this additive process of form making was

limited to a linear one, wherein the

# Online Library Building

author of the  
structure manually  
stacked, flipped and  
rotated platonic  
solids to achieve a  
desired singular end  
result.
