The celebration of Washington D.C. basketball is long overdue. The D.C. metro area stands second to none in its contributions to the game. Countless figures who have had a significant impact on the sport over the years have roots in the region, including E.B. Henderson, the first African-American certified to teach public school physical education, and Earl Lloyd, the first African-American to take the court in an actual NBA game. The city's Spingarn High School produced two players — Elgin Baylor and Dave Bing — recognized among the NBA 's 50 greatest at the League 's 50th anniversary celebration. No other high school in the country can make that claim. These figures and many others are chronicled in this book, the first-ever comprehensive look at the great high school players, teams and coaches in the D.C. metropolitan area. Based on more than 150 interviews, *The Capital of Basketball* is first and foremost a book about basketball. But in discussing the trends and evolution of the game, McNamara also uncovers the turmoil in the lives of the players and area residents as they dealt with prejudice, educational inequities, politics, and the ways the area has changed through the years.

Welcome to the first step in your personal finance journey. Whether this is the first time you have seen materials on money or have been exploring money topics for some time and are looking to understand in a robust format, “ Everything About Money ” will serve you well. The materials in this book are ones that do not age, over time as your understanding of the materials matures it will pay you in the form of cash in your bank account from the decisions you will be able to make. The book is structured as if you were taking a course on money at your local college, beginning with orientation and moving throughout the course and understanding more and more complicated materials. By the end of this book, you should be able to identify consciously what type of money decisions you are making and how they affect your overall money picture. This book was written for two reasons. The first is that as an accountant, people generally come to you with money questions. Over time you begin to get the same questions over and over. This issue seen with money is that there needs to be a comprehensive understanding of money to make decisions on your own. People often seem to think asking specific questions about one transaction is sufficient to make a good decision. The truth of it is that understanding your big picture, how a transaction affects your ecosystem of money, and what the costs over the long run are all things that need to be considered and cannot be understood without a foundational understanding of money - that is what this book serves to do, give you the fundamentals so that

you can think about your money in a framed way. This is not enough though; money is a lifelong journey of learning. The second reason this book was written is because we see people dig themselves into a “ hole ” too often, and the solution often takes years to get out of. We will understand later in the course the specifics of this, but generally because people turn to banks to give them money to purchase things, we see people move from working for themselves and their families, to working for the bank, paying the bank month over month fees for borrowing money, and eventually getting into a corner where lifestyle, income, and expenses do not align. This book hopes to frame this scenario too often and move you away from these habits to find a better money picture for yourself and your family. You have taken the first step, now let us get through this course!

School Choice in China explores the major characteristics of schooling options in China, highlighting how largely middle-class parents exploit their cultural, economic and social capital for their children's admission into choice schools. It highlights how payments such as choice fees, donations, prize-winning certificates and awards, as well as the use of guanxi, result in Chinese school choice as a parent-driven, bottom-up movement. The author also explores how schools and local governments cash in on the school choice fever in order to obtain significant economic returns, leading to policies that accommodate the needs of mostly middle-class families. He argues that although this system seems to create winners among the parties involved, it exacerbates the educational inequality that already exists in Chinese society. Chapters include: Positional competition for cultural capital Exploitation of social capital Economics of school choice Class reproduction through parental choice This book is not simply a detailed analysis of Chinese school choice practices, but also a study of the competitive middle class search for advantage for their children. As such it will be beneficial to undergraduates, postgraduates, education professionals, policy makers, and anyone with an interest in education, sociology, social policy, and the rise and future of China.

The Directory of Corporate Counsel, Fall 2020 Edition remains the only comprehensive source for information on the corporate law departments and practitioners of the companies of the United States and Canada. Profiling over 30,000 attorneys and more than 12,000 companies, it supplies complete, uniform listings compiled through a major research effort, including information on company organization, department structure and hierarchy, and the background and specialties of the attorneys. Research in school success in contemporary China has argued that market reforms have reproduced the advantages for children from the cadre and the professional families while simultaneously creating new opportunities for children of the new arising economic elites. However, it has performed less for traditional peasant families. This book places a special emphasis on how rural parents from different social backgrounds use guanxi (interpersonal social networks) to maintain the interconnectedness between their families and schools to create advantages for their children in school success. It investigates, by an ethnographic study in a rural county in middle China, how families from different social backgrounds within rural society get

involved in the schooling of their children and how this contributes to different patterns of school success. The book argues that schools provide few formal and routine channels for rural parents to become involved in their children ' s schooling. This raises the importance of family strategic initiatives to employ guanxi in the creation of advantages for their children ' s school success. It concludes with discussions about guanxi as an important mechanism for social exclusion in post-socialist China. Chapters include: Family Strategies, Parental Involvement, and School Success The Roles of Parents: Voices of Parents in Zong Regarding School Involvement Policy Discourses: Missing the Link between Family and School Peasants: Family and Kinship The Blurring Division between Home and School This concise and comprehensive book is a qualitative study that will appeal to researchers and advance students in Chinese education and society.
