Real-world scenarios help you develop clinical reasoning skills for primary care! *Case Studies in Primary Care: A Day in the Office, 2nd Edition* includes 50 case studies on the most commonly encountered situations in primary care. Demonstrating the kinds of health problems that a Nurse Practitioner or Physician Assistant might see during a typical clinical day, case studies cover patients from various cultures and all ages. You're asked to analyze data and think critically in reaching accurate diagnoses and planning effective treatment; you can then submit your responses online for grading and instant feedback. Real-world scenarios offer the opportunity to analyze clinical situations likely to be encountered in today's primary care settings, providing practice in clinical reasoning skills. Day in the Office format presents cases hour by hour, in the way a typical clinical day might unfold. Emphasis on problem-based learning helps you to think critically and analyze clinical situations — such as ear infections, diarrhea, and coughing and fever — in order to provide appropriate primary care. Six NEW cases are included (for a total of 50), with three focusing on older clients with more complex health challenges, one addressing unplanned pregnancy, and two addressing practice management issues. NEW! Emphasis on follow-up care addresses patients coming to the primary care setting from retail clinics, rehabilitation settings, or acute-care settings, and underscores the importance of interprofessional collaboration. NEW! Enhanced patient diversity includes cases for all age groups, and reflects a more contemporary appreciation of cultural diversity and gender/gender identity. NEW! Updates to all cases ensure that case studies and feedback are consistent with the latest research evidence, clinical practice guidelines, and national and international treatment standards. NEW! Online answer submission allows you to write Assessment and Plan answers in the printed book, then submit answers online for grading and feedback. NEW! Grading rubrics are provided on the companion Evolve website to help you develop your answers. NEW! Introduction explains how to get the most out of the book.

Gain expertise in primary care of older adults with a case-based approach to geriatric primary care and multimorbidity management. Written by two leading academic and clinical experts in geriatric primary care, *Case Studies in Geriatric Primary Care and Multimorbidity Management, 1st Edition* uses detailed Exemplar Case Studies and Practice Case Studies to teach you how to think like an expert geriatric clinician. Because most older adults have more than one condition when seeking care, both Exemplar and Practice Case Studies place a strong emphasis on "multimorbidity" management, (the management of patients with a host of complex, interacting conditions). To provide extensive practice in learning how to think like an expert, case studies reflect the reality that care does not necessarily begin or end in the primary care setting. Cases therefore move fluidly from primary care to acute care to inpatient rehabilitation to assisted living to long-term care. Building on foundational introductory chapters, cases also call on you to develop interprofessional collaboration skills and reflect the diversity of today's older adults, in terms of age (young-old to old-old), gender, culture, ethnicity, sexuality, socioeconomic status, and more! As you work through both basic-level and advanced Practice Case Studies, you can make extensive notes in the printed book and then go online to submit answers for grading and receive expert feedback for self-reflection. NEW! Introductory unit on the core principles of caring for older adults gives you a strong foundation in the principles of geriatric primary care and multimorbidity management. NEW! and UNIQUE! Exceptionally detailed, unfolding Exemplar Case Studies demonstrate how an expert advanced practitioner "thinks clinically" to provide care to older adults with multiple conditions. NEW and UNIQUE! Exceptionally detailed, unfolding Practice Case Studies emphasize patient diversity and multimorbidity management across healthcare settings to help you develop advanced clinical reasoning skills for geriatric primary care. NEW and UNIQUE! Strong emphasis on multimorbidity management focuses on caring for older adults with multiple chronic conditions. NEW! Emphasis on the continuum of care across settings reflects the reality that care does not necessarily begin or end in the primary care setting but can move from primary care to acute care to inpatient rehabilitation to assisted living to long-term care, and so forth. NEW! Online answer submission for grading and expert feedback for self-reflection. NEW! Emphasis on patient diversity reflects the makeup of today's older adult, population in terms of age (young-old to old-old), gender, culture, ethnicity, sexuality, socioeconomic status, and more. NEW! Emphasis on interprofessional collaboration use Exemplar Case Studies and Practice Case Studies to allow you to demonstrate your interprofessional collaboration skills.

Chinese internal medicine is the foundation of clinical practice of Chinese medicine and covers a large variety of diseases and symptoms. Developing expertise in every internal disease requires a lot of practice and extensive studies. However, after mastering the theory of Chinese medicine and classical understanding of the etiology and pathomechanism of diseases, the practitioner must acquire many years of clinical practice. One could spend years accumulating firsthand experience. However, since there is ample information collected from successful cases studies available to us, it is highly profitable for the practitioner to analyze and grasp the knowledge through the experience of the masters that came before them. In this approach, medicine itself will continue to evolve and improve. This collection of internal medicine clinical cases contains clear and detailed analysis of commonly seen diseases such as diabetes, Parkinson's Disease, post stroke sequelae, insomnia, epilepsy, bipolar disorder, emaciation, rheumatoid arthritis and many more. These medical cases are concrete and filled with medical knowledge from experts on the theory, treatment principles and methods with medicinals, formulas, acupuncture and moxibustion. In addition, to deepen the level of understanding of the diseases, comprehension questions have been added at the end of each chapter with detailed answers. This clinical case study collection is a most for all practitioners of Chinese medicine.
