Author of Lincoln and His Admirals (winner of the Lincoln Prize), The Battle of Midway (Best Book of the Year, Military History Quarterly), and Operation Neptune (winner of the Samuel Eliot Morison Award for Naval Literature), Craig L. Symonds ranks among the country's finest naval historians.World War II at Sea is his crowning achievement, a narrative of the entire war and all of its belligerents, on all of the world's oceans and seas between 1939 and 1945. Here are the major engagements and their interconnections: the U-boat attack on Scapa Flow and the Battle of the Atlantic; the "miracle" evacuation from Dunkirk and the scuttling of the French Navy; the pitched battles for control of Norway fjords and Mussolini's Regia Marina; the rise of the KidoButai and Pearl Harbor; the landings in North Africa and New Guinea, then on Normandy and Iwo Jima. Symonds offers indelible portraits of the great naval leaders - FDR and Churchill (self-proclaimed "Navy men"), Karl Donitz, Francois Darlan, Ernest King, Isoroku Yamamoto, Louis Mountbatten, andWilliam Halsey - while acknowledging the countless seamen and officers of all nationalities whose lives were lost during the greatest naval conflicts ever fought. World War II at Sea is history on a truly epic scale.

Traces the events surrounding the final American bombing mission of World War II, identifying a Japanese rebel plot for a massive coup that would have kept Japan in the war and prevented its surrender to Allied forces in August 1945. Reprint. (A History Channel documentary airing Summer 2003)

With 83 additional outline and four-color maps, World Civilizations: The Global Experience, Fifth Edition, Atlas Edition, helps students with geography, one of the most difficult aspects of World history courses for many. The maps are accompanied by review questions that call on students to identify important geographical areas and think critically about the connection between geography and historical events. The maps are on perforated pages and are organized by chapter so that they can be assigned easily and collected. The primary goal of World Civilizations is to present a truly global history—since the development of agriculture and herding to the present. Using a unique periodization, this book divides the main periods of human history according to changes in the nature and extent of global contacts. This global world history text emphasizes the major stages in the interactions among different peoples and societies, while also assessing the development of major societies. Presenting social and cultural as well as political and economic aspects, the book examines key civilizations in world history. World Civilizations balances this discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact.

A broad-ranging study of the relationship between alliances and the conduct of grand strategy, examined through historical case studies.
