Kurose and Ross manage to convey the principles of computer networking (often considered "dry" material) in a

technically precise yet entertaining way. A good measure of humorous bits and off-the-cuff remarks are sprinkled throughout the text, making the reading fun (students love it).

Computer Networking: A Top-down Approach Featuring the ...

Focusing on the Internet and the fundamentally important issues of networking, this text provides an excellent foundation for students in computer science and electrical engineering, without requiring extensive knowledge of programming or mathematics.

Computer Networking: a Top Down Approach

We have also been active researchers in computer networking during this time. (In fact, Jim and Keith first met each other as master's students in a computer networking course taught by Mischa Schwartz in 1979 at Columbia

University.) We think all this gives us a good perspective on Teaching networking, and an appreciation for high-quality ...

Computer Networking: a Top Down Approach
This can be done in simulated

scenarios or in a "real" network environment such as the Internet. The Java applets in the textbook Web site take the first approach. In these Wireshark labs, we'll take the latter approach. You'll be running various network applications in different scenarios using a computer on your

desk, at home, or in a lab.
