Distinguishing Between Delay and Disruption—Excell—

Delay damages refer to damages "arising out of delayed completion, suspension, acceleration or disrupted performance"; these damages compensate the contracting party that is injured when a project takes longer than the construction contract specified....

One Awesome Case Discussing The Difference Between Delay—

When the task force first met, the members examined delay and disruption on construction projects from "a 50,000-foot perspective," noting that both public and private projects suffered delay and disruption and that the contract terms addressing delay and disruption varied widely, says task force member, Carole Bionda, vice president at Nova Group Inc. in Napa, California, an AGC of California member.

De-Constructing Delays and Disruptions—Constructor Magazine

Since there is an overlap in delay and disruption, knowing construction law helps to determine the liability of the individuals involved in the process. For example, if a contractor fails to complete a project on time, they may be liable for both disruption and delay claims, depending on the situation.

Disruption Claims and Delay Claims in Construction Law—

Disruption, and claims arising to try and recoup losses incurred from it, are common on construction projects, particularly on larger and more complex projects. The difference between disruption and delay is that the latter relates to lateness rather than productivity, although they can often be related. Delays can cause disruptions, and vice versa.

Disruption claims in construction—Designing Buildings Wiki

Delay claims on a construction can be confusing, especially when you think about the delay to the work being performed and the disruption to other activities. A few years ago, I found a case the...

No Longer in the Dark—A Primer on the Distinction between—

Construction delays are considered as time lag in completion of activities from its specified time as per contract or can be defined as late completion or late start of activities to the baseline schedule, directly affecting specified cost. As a result, there will be extensions of time required which will further result in fine, increased cost due to inflation, termination of contract, court cases etc. or combinations of above stated factors, resulting in delay damages.

Delays in Construction Projects—Its Types, Effects and—

Delay and disruption in construction—overview Delay or disruption affecting the progress of the works on a construction project is dealt with in different ways, depending on the cause of it and its impact on the contractor's ability to complete the works in accordance with the contractual programme.

Delay and disruption in construction—overview—Lexis®PSL—

Delay and disruption often occur together, but they are quite distinct issues. Delay, as it sounds, is being late. Disruption on the other hand, is a change to the planned working method.
