"Tells the story of migrants and communities in the Southeast Asian borderlands. The Black Flags raided their way from southern China into northern Vietnam, competing in the second half of the nineteenth century against other armed migrants and uplands communities for control of commerce (e.g., opium) and natural resources (e.g., copper for making coins). At the edges of empires--the Qing empire in China, the Vietnamese empire governed by the Nguyen dynasty, and, eventually, French colonial Vietnam--the Black Flags and their rivals sustained networks of power and dominance through the framework of political regimes. The history of these imperial bandits and the communities that resisted them demonstrates the plasticity of borderlines, the limits of imposed boundaries, and the flexible division between apolitical banditry and political rebellion in the borderlands of China and Vietnam. Historical studies of these areas tend to examine events only from the perspective of local communities or from the anxious view of imperial officials. By focusing on the Black Flags, upland communities, and their relationships to various empires, this study illustrates borderland processes at the violent edges of empire. It contributes to the ongoing reassessment of borderland areas as frontiers for state expansion, arguing that projects of empire often were instruments of power for armed migrants and their allies, and that, as a setting for forms of human activity that defy tight boundaries, borderlands continued to exist well after the establishment of formal boundaries"--

What are the foundational scriptures and major schools for Chinese Buddhists? What divinities do they worship? What festivals do they celebrate? These are some of the basic questions addressed in this book, the first introduction to Chinese Buddhism written expressly for students and those interested in an accessible yet authoritative overview of the subject based on current scholarship. After presenting the basic tenets of the Buddha's teachings and the Chinese religious traditions, the book focuses on topics essential for understanding Chinese Buddhism: major scriptures, worship of buddhas and bodhisattvas, rituals and festivals, the monastic order, Buddhist schools such as Tiantai and Chan, Buddhism and gender, and current trends—notably humanistic Buddhism in Taiwan and the resurgence of Buddhism in post-Mao China. Each chapter ends with discussion questions and suggestions for further reading. A convenient glossary of common terms, titles, and names is included.

The Columbia History of Chinese Literature is a comprehensive yet portable guide to China's vast literary traditions. Stretching from earliest times to the present, the text features original contributions by leading specialists working in all genres and periods. Chapters cover poetry, prose, fiction, and drama, and consider such contextual subjects as popular culture, the impact of religion, the role of women, and China's relationship with non-Sinitic languages and peoples. Opening with a major section on the linguistic and intellectual foundations of Chinese literature, the anthology traces the development of forms and movements over time, along with critical trends, and pays particular attention to the premodern canon.

Nominated for the National Book Award, Barry Hannah's brilliant debut offers "a fresh angle on the great American subject of growing up" (John Updike). Roiling with love and torment, lunacy and desire, hilarity and tenderness, *Geronimo Rex* is the bildungsroman of an unlikely hero. Reared in gloomy Dream of Pines, Louisiana, whose pines have long since yielded to paper mills, Harry Monroe is ready to take on the world. Inspired by the great Geronimo's heroic rampage through the Old West, Harry puts on knee boots and a scarf and voyages out into the swamp of adolescence in the South of the 1950s and '60s. Along the way he is attacked by an unruly peacock; discovers women, rock 'n' roll, and jazz; and stalks a pervert white supremacist who fancies himself the next Henry Miller in this "stunning piece of entertainment . . . vulgar, ribald, and wildly comic" (*The New York Times*). "Hannah writes about adolescence with a rare pizzazz and insight." —*Rolling Stone*

A book that dares to describe individualism as a religion and paint a reality that is primarily virtual, rather than physical. While the authors don't mind challenging the reader's view of the self and the world, their main intention is to induce passive receivers of the future to become more active participants. Engaging observations and perceptive interpretations of contemporary society.

Up until the global credit crisis in 2008, 'Financial Services' was the fastest growing sector of the Australian economy. This growth has had profound implications for individuals, corporations and government. Following extensive review in the last part of the twentieth century, Australia put in place an overarching system for regulating all financial services, replacing a system that was based on separate regulation of products in individual industries. Focusing on the implications of the new system for retail clients - 'financial citizens' - *Financial Services Law and Compliance in Australia* provides a comprehensive account of the regulatory structure and a detailed analysis of the legislative framework, including discussion of the new regulatory bodies, the new licensing requirements for those wishing to enter the financial services market and the new obligations for those marketing or offering financial services to the public. This is an essential resource for those working in, and advising on, financial services, for students of financial services law, and for anyone needing to understand this new regime in Australia.
