Initial Clinical Impressions of the Critical Care of COVID ...

Abstract. Purpose of review: Lung ultrasound, which allows a bedside visualization of the lungs, is increasingly used in critical care. This review aims at highlighting a simple approach to this new discipline. Recent findings: The 10 basic signs are the bat sign (indicating pleural line), lung sliding (yielding the seashore sign), the A line (horizontal artifact), the quad and sinusoid sign indicating pleural effusion regardless of its echogenicity, the tissue-like and shred sign indicating ...

Lung ultrasound in the critically ill

Multimodality monitoring is a common practice in caring for neurocritically ill patients, and consists mainly in clinical assessment, intracranial pressure monitoring and using several imaging methods. Of these imaging methods, transcranial Doppler (TCD) is an interesting tool that provides a non-invasive, portable and radiation-free way to assess cerebral circulation and diagnose and follow-up (duplex method) intracranial mass-occupying lesions, such as hematomas and midline shift.

Transcranial Doppler ultrasound in neurocritical care

Wisdom in Diagnostic Imaging Wisdom is the knowledge and understanding to deliver a report/consultation that moves the medical decision making process forward with the confidence and precision of an expert, whether a study is normal or abnormal. This is what we teach.

Diagnostic Imaging In Critical Care A Problem Based ...

Its ease of use, rapidity, repeatability, and reliability make thoracic ultrasonography the "go to" modality for imaging the lung and pleura in an efficient, cost effective, and safe manner, such that it can largely replace chest imaging in critical care practice.

Thoracic ultrasonography: a narrative review

The use of ultrasound has gained its place in critical care as part of our day-to-day monitoring tools. A better understanding of ultrasound techniques and recent publications including protocols for the lungs, the abdomen and the blood vessels has introduced ultrasound to the bedside of our ICU patients.
