INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what ' s really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

This introductory text surveys the techniques, methods and theoretical frameworks of contemporary archaeology. Coverage of method and theory resides in the context of an ideal research plan to explain what archaeologists do, how they conduct research, and how they use the results to construct our past. Integration of traditional and recent innovative approaches to archaeology provides a balanced scientific and humanistic perspective.

Travel to the Andes with cultural anthropologist Johan Reihard as he unearths Inca mummies and artifacts. Learn about this ancient civilization, the challenges of high altitude archaeology, and how modern technology is used to glean information.

This brief, inexpensive introduction to the techniques, methods, and theoretical frameworks of contemporary archaeology follows the same organizing principle as the text Archaeology: Discovering Our Past but features less detail. Archaeological methods and theory are covered comprehensively--at a reasonable level of detail--in under 300 pages. Illustrative examples and case studies present a temporal and geographic balance of both Old and New World sites. Abundant student aids include maps of archaeological areas, extensive illustrations, chapter introductions and summaries, a guide to further reading at the end of each chapter, a glossary, a bibliography, and an index.

Connect to core World History content with an accessible, student-friendly text built on the principles of Understanding by Design.

Reinforce critical concepts from the text and help students improve their reading-for-information skills with this essential resource, written 2-3 grade levels below the Student Edition
