If your people know you care about them, they will move mountains. Employee engagement and loyalty expert Heather Younger outlines nine ways to manifest the radical power of caring support in the workplace. Heather Younger argues that if you are looking for increased productivity, customer satisfaction, or employee engagement, you need to care for your employees first. People will go the extra mile for leaders who show they are genuinely concerned not

just with what employees can do but with who they are and can become. But while most leaders think of themselves as caring leaders, not all demonstrate that care in consistent ways. Your employees will judge you by your actions, not your intentions. Based on Younger's interviews with over eighty leaders for her podcast Leadership with Heart—including Howard Behar, former president of the Starbucks Coffee Company; Judith Scimone, senior vice president and chief talent officer at MetLife; Garry Ridge, CEO and chairman of the board of the WD-40 Company; and Shawnté Cox Holland, head of culture and engagement at Vanguard—this book outlines nine ways that leaders can make all employees feel included and cared for.

She even provides access to a self-assessment so you can measure your progress as a caring leader. But this is not a cookie-cutter approach: just as Monet and Picasso expressed themselves very differently, each leader should express caring in his or her own unique, personal style. Younger takes an often nebulous, subjective concept and makes it concrete and actionable. Leaders have the power to change the lives of those they lead. They shouldn't just want to care, they should see caring as imperative for the success of their employees and their organization.

This book is wisdom in action.” Now updated for first time in well over a decade, this powerful book reveals why today, more than ever, leadership is more an art than a science. The Art of Strategic Leadership uses a unique approach to examine what it means to be a strategic leader. Instead of focusing on the skills, behaviors, and tools found in typical books on strategic leadership, the authors shed light on the attributes and qualities necessary to lead strategic change and help transform a business. Leadership is still much discussed, studied, and sought after, even though we now live in supposedly more democratic times with flatter organizations and empowered employees. approaches help us to pick and develop leaders or are there alternative ways that advance our understanding? In this book, Keith Grint who has been studying and teaching leadership for over a decade investigates the notion of leadership in a series of historical case studies and rich essay portraits of some of the most famous, and infamous, leaders (e.g. Florence Nightingale, Richard Branson, Horatio Nelson, Martin Luther King, Henry Ford, etc.). The scenarios are drawn from right across the spectrum to include business, politics, society, and the military. The first part of the book considers four sets of parallel cases where leadership appears to be a major explanation of success and failure. The second part takes the four

critical issues arising from these parallel cases (identity, strategic vision, organizational tactics, and persuasive communication) and explores them in detail. One main reason we have such difficulty in explaining and enhancing leadership, Grint argues, is because we often adopt perspectives and models that obscure rather than illuminate the issues involved. The reliance upon traditional scientific analysis has not provided the anticipated advances in our understanding because leadership is more fruitfully considered as an art, or more exactly an array of arts, rather than as a science. Grint's rich and meticulously-researched profiles combine to reveal these Arts of Leadership.
