invasive evaluation of blood flow through your arteries and veins. This test provides information to help your vascular surgeon make a sound diagnosis and outline a treatment plan. Accuracy is critical, so ultrasound testing should ALWAYS be performed by a credentialed sonographer in an accredited vascular laboratory.

Duplex Ultrasound | Society for Vascular Surgery  
Duplex ultrasound involves using high frequency sound waves to look at the speed of blood flow, and structure of the leg veins. The term "duplex" refers to the fact that two modes of ultrasound

are used, Doppler and B-mode. The B-mode transducer (like a microphone) obtains an image of the vessel being studied.

## Duplex Ultrasound | Stanford Health Care

Renal duplex ultrasound examines the kidneys and their blood vessels. You may need to wear a medical gown. You will lie down on a table, and the ultrasound technician will spread a gel over the area being tested. The gel helps the sound waves get into your tissues. A wand, called a transducer, is moved over the area being tested. This wand sends out the sound waves. A computer

Wikipedia

Duplex ultrasonography is a medical non-invasive study, which combines: Traditional ultrasound – creates pictures using sound waves which are reflected by the tissues. Doppler ultrasound – records sound waves reflecting off moving objects; Ultrasound passes through human tissues and fluids but is bounced back off certain structures.

Duplex ultrasonography (more  
commonly but less correctly  
known as duplex ultrasound)  
is a form of medical  
ultrasonography that  
incorporates two elements:  
1) Grayscale Ultrasound to  
visualize the structure or  
architecture of the body  
part. No motion or bloodflow  
is assessed.

technique, ranging from the basics of performing the examination to the features of sometimes complex pathological states. The book is intended for anyone interested in non-invasive vascular diagnosis including radiologists, vascular surgeons and ultrasound/peripheral vascular technologists. Other groups may find individual chapters appealing: carotid/cardiac sonography for cardiologists, fetal sonography for obstetricians or carotid sonography for neurologists. Each chapter is not only a guide to duplex evaluation, but also
