As mentioned, gathering points and small construction planned together is an excellent use of space. Role play areas in close proximity to writing/mark making also works well, as children can often be seen popping out from roleplay areas with a real reason to write before popping back in.

8 Ways to Plan the Perfect Learning Environment in Early Years

The learning environment is the mix of spaces and context in which a young child grows and learns. The environment is often referred to as the “ third teacher ” (after parents and educators) due to its importance in early learning. While the environment can refer to a child ’ s home, the outdoors, or a classroom, we will focus on the preschool as a learning environment. Environments should be welcoming and interesting.

The Importance of Early Learning Environments | Natural Pod

Learning environments Truly enabling environments, be they indoors or out, allow children to experiment free from the fear of failure Enabling environments should be age-specific, appealing to children ’ s interests, making them feel happy, challenged, safe and secure. They should be places where they can confidently play and learn.

Children get the most out of a learning experience by the environment that is created in the classroom

Reimagine the potential in your outdoor space.

What does it mean to inquire? Grownups would say it means to question, to search for information, or to finding out about a topic of interest. For children in an early childhood classroom, the definition is no different. From the time of their birth, children want to know how the world works and actively seek out information. How educators respond to their quest is what this book is all about. Inquiry-Based Early Learning Environment takes an in-depth look at children ’ s inquiry. What does inquiry look like in early childhood settings? How does the environment affect children ’ s inquiries and teachers ’ thought processes? Inquiry-Based Early Learning Environment examines inquiry in all its facets, including environments that support relationships, that create a culture of risk-taking in our thinking, that support teachers as well as children, that include families, that use documentation as a way of thinking about our work, and of course, the physical environment and all the objects and spaces within it. Throughout, stories about environments and approaches to inquiry from around the world are included as examples.

The Research on Women and Education SIG of the American Educational Research Association presents the third book in its series, Gender and Early Learning Environments. Finding after the publication of Gender and Schooling in the

Early Years, the second book in the series, that there was and is a paucity of published literature on early childhood gender issues, the editors determined that one additional book on early childhood and gender issues was warranted in this series. The latest book in the series, *Gender and Early Learning Environments*, is encompassing of a wide range of topics addressing early childhood influences on gender and development of the whole child. For early childhood educators, this book aides in making visible and exploring the definition of what gender means in contemporary culture.

This is a concise overview of the fundamentals of teaching in early childhood settings (pre-K – 2). Beginning with what the research tells us about how young children develop and learn, Falk shows how to create learning environments, plan, teach, and assess in ways that support children ’ s optimal development. “ This text is a portrait of what it means to be an early childhood professional and to take seriously the job of establishing meaningful relationships with children, families, and professional colleagues. ” —From the Foreword by Jacqueline Jones, Foundation for Child Development “ No less than a manual for creating growth-enhancing experiences in early childhood, Beverly Falk has distilled years of experience into practical advice and well-researched lessons. ” —Samuel J. Meisels, founding executive director, Buffett Early Childhood Institute, University of Nebraska “ Brilliantly challenges us to translate what we know into what we do in order to improve school and life outcomes for ALL children. ” —Maurice Sykes, Early Childhood Leadership Institute “ Falk brings us critical knowledge about early childhood in this superb book. ” —Ann Lieberman, Stanford Center for Opportunity Policy in Education

Design a classroom environment that encourages learning!

“ These pages make clear that the way to foster effective teaching is not with curriculum mandates and pacing guides but with professional learning opportunities that prepare expert educators to take advantage of and create teachable moments. ” —From the Foreword by Linda Darling-Hammond, Stanford University This book brings together a group of extraordinary educators and scholars who offer important insights about what we can do to defend childhood from societal challenges. The authors explain new findings from neuroscience and psychology, as well as emerging knowledge about the impact on child development of cultural and linguistic diversity, poverty, families and communities, and the media. Each chapter presents experiences and suggestions, from the perspectives of different disciplines, about what can be done to ensure that all children gain access to the supports they need for optimal physical, social, intellectual, and emotional development. *Defending Childhood* features: New knowledge about how children learn from the neurobiological, behavioral, and social sciences. Effective teaching strategies that support learning and provide for the needs of the whole child. Examination of a broad range of issues that affect childhood, including violence, media and technology saturation, and a school culture of endless testing. Suggestions for policies and practices for an equitable educational system. Contributors include: Barbara Bowman, Nancy Carlsson-Paige, Delis Cu é llar, Tiziana Filippini, Matia Finn-Stevenson, Eugene Garc í a, Howard Gardner, Roberta Michnick Golinkoff, James J. Heckman, Kathryn Hirsh-Pasek, Mara Krechevsky, George Madaus, Ben Mardell, Sonia Nieto, Valerie Polakow, Aisha Ray, Robert L. Selman, Jack P. Shonkoff, M.D., Edward Zigler Beverly Falk is professor and director of the Graduate Programs in Early Childhood Education at The School of Education, The City College of New York, and author of *Teaching the Way Children Learn*.

Bringing together a diverse cohort of experts, *STEM in Early Childhood Education* explores the ways STEM can be integrated into early childhood curricula, highlighting recent research and innovations in the field, and implications for both practice and policy. Based on the argument that high-quality STEM education needs to start early, this book emphasizes that early childhood education must include science, technology, engineering, and mathematics in developmentally appropriate ways based on the latest research and theories. Experienced chapter authors address the theoretical underpinnings of teaching STEM in the early years, while contextualizing these ideas for the real world using illustrative examples from the classroom. This cutting-edge collection also looks beyond the classroom to how STEM learning can be facilitated in museums, nature-based learning outdoors, and after-school programs. *STEM in Early Childhood Education* is an excellent resource for aspiring and veteran educators alike, exploring the latest research, providing inspiration, and advancing best practices for teaching STEM in the early years.

An in-depth look at children's inquiry and effects of environment in early childhood settings.
