The literature, however, is surprisingly sparse in describing to what extent services should be integrated, how this integration should be carried out, or in detailing the challenges inherent in the transition to services. Reports on a study of 11 capital equipment manufacturers developing service offerings for their products. Focuses on identifying the dimensions considered when creating a ...

Some routinely claim that the 'evolution from products through services to solutions' is inevitable. Others think that manufacturing is being outsourced to China and India while American or European teenagers face a career in hamburger stalls. The truth is much more fascinating. To succeed in a service business, most functions of a product company need to change. Operations, management ...

Companies can capture value from many sources including customer-funded new products and services, merchant-funded platform usage, and third-party-funded data monetization. Telefonica, a European telco, has been actively leveraging its customer data and insights to develop new IoT (Internet of Things), digital content, and healthcare services.
