medical care to hospitalized patients. Both models have been found to be effective; the US model reducing length of stay and costs without compromising quality of care, whereas the UK model is associated also with reduced length of stay and mortality (Wachter RM & Bell D 2012). These two models are developing differently.

This book describes geriatrics practice models that are used to guide the care of older adults, allowing seniors to remain at home, prevent functional disability and preserve quality of life. The models include specific interventions which are performed by health care workers to address the needs of older persons and their caregivers. These models respect patient values, consider patient safety and appreciate psychosocial needs as well. Divided into six parts that discuss hospital-based models of care, transitions from hospital to home, outpatient-based models of care and emergency department models of care, this text addresses the needs of vulnerable patients and the community. Geriatric Models of Care is an excellent resource for health care leaders who must translate these programs to address the needs of the patients in their communities.

Acute Care for Elders (ACE) is a model of care designed to improve functional outcomes and to improve the processes for the care of older patients. This model includes: an environment of care designed to promote improved function for older patients; an interdisciplinary team that works together to identify/address the vulnerabilities of the older patients; nursing care plans for prevention of disability; early planning to help prepare the patient to return home and a review of medical care to prevent iatrogenic illness. Acute Care for Elders: A Model for Interdisciplinary Care is an essential new resource aimed at assisting providers in developing and sustaining an ACE program. The interdisciplinary approach provides an introduction to the key vulnerabilities of older adults and defines the lessons learned from the Acute Care for Elders model. Expertly written chapters describe critical aspects of ACE: the interdisciplinary approach and the focus on function. The fundamental principles of ACE described in this book will further assist hospital leaders to develop, implement, sustain and disseminate the Acute Care for Elders model of care. Acute Care for Elders: A Model for Interdisciplinary Care is of great value to geriatricians, hospitalists, advance practice nurses, social workers and all others who provide high quality care to older patients.

The first book dedicated explicitly to the care of elderly patients with rheumatic diseases, this comprehensive resource is a practical guide for navigating the medical concerns of these complex patients. While patients over 65 years of age comprise roughly 15% of the population, they consume about 50% of rheumatology resources. This book presents current clinical practices with an eye toward achieving economically sustainable models of care. The world ' s leading authorities have come together to cover the full spectrum of rheumatic diseases, the immune system in aging, and ultrasound evaluation and arthrocentesis. The book also addresses the milieu of co-morbidities that the clinician may encounter with an older patient, as well as the accompanying concerns about multiple pharmacologic therapies and drug interactions. Bringing in experts from a wide array of subspecialties, the editors present the essentials of multidisciplinary care, an approach which is the hallmark of geriatrics and which naturally translates into the field of gerontorheumatology. Designed for primary care physicians and rheumatology consultants, Geriatric Rheumatology is an invaluable guide to caring for this rapidly growing patient population.

This new edition of one of the premier references for geriatric nurses in hospital, long-term, and community settings delivers current guidelines, real-life case studies, and evidence-based protocols developed by master educators and practitioners. With a focus on improving quality of care, cost-effectiveness, and outcome, the fifth edition is updated to provide the most current information about care of common clinical conditions and issues in older patients. Several new expert contributors present current guidelines about hip fractures, frailty, perioperative and postoperative care, palliative care, and senior-friendly emergency departments. Additionally, chapters have been reorganized to enhance logical flow of content and easy information retrieval. Protocols, systematically tested by more than 300 participating NICHE (Nurses Improving Care for Health system Elders) hospitals , are organized in a consistent format and include an overview, evidence-based assessment and intervention strategies, and an illustrative case study with discussion. Additionally, protocols are embedded within chapter text, providing the context and detailed evidence for each. Chapter objectives, annotated references,and evidence ratings for each protocol are provided along with resources for additional study. New to the Fifth Edition: Reorganized to enhance logical flow of information and ease of use Updated and revised Includes new contributions from expert educators and practitioners Provides new chapters on perioperative and postoperative care, general surgical care, care of hip fracture, palliative care, and the senior-friendly emergency department Key Features: Includes PowerPoints and a test bank for instructors Delivers evidence-based, current guidelines and protocols for care of common clinical conditions in the older person Illustrates the application of clinical protocols to real-life practice through case studies and discussion Edited by nationally known geriatric leaders who are endorsed by the Hartford Institute for Geriatric Nursing and NICHE Written for nursing students, nurse leaders, and practitioners at all levels, including those in specialty roles

Note to Readers: Publisher does not guarantee quality or access to any included digital components if book is purchased through a third-party seller. A,N Book of the Year 2016 First-Place Winner in Gerontological Nursing! " The evidence-based protocols are designed as a primary reference and are useful, substantive, and timely....The broader contributions of useful format and succinct review of the evidence make it likely that this text will continue to be the leading resource in nursing education and practice. " —The Gerontologist " As a gerontological clinical educator /research nurse, I will often use this as a reference. The format and the content are good, and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice. " Score: 97,**** —Doody ' s The newest edition of this distinguished reference in geriatric nursing delivers updated guidelines, new illustrative case studies, and the latest evidence-based protocols developed by leading researchers, educators, and practitioners in each topic area. The sixth edition includes new approaches devoted to supporting LGBTQ+ elders, persons living with dementia and their families, and older adults living with HIV. New operational strategies provide guidance in using the electronic health record, implementing improved person-centered care approaches, and maintaining age-friendly atmospheres. Using evidence derived from all levels of care, this text offers developed guidelines for improving both quality and outcomes when caring for older adults in multiple disciplines, including interprofessional team members, long-term care and other staff educators, social workers, dietitians, and physicians. Chapters provide assessment and management principles, clinical interventions, specialty practice, and models of care. They consistently feature chapter objectives, annotated references, evidence ratings for each protocol, and resources for further investigation. Each protocol is embedded within the chapter content to provide context and detailed evidence. The protocols consistently include an overview, evidence-based assessment, intervention strategies, and a supporting case study with discussion. PowerPoint presentations and a test bank are available as instructor ' s resources. New Chapters: Informational Technology: Embedding CPGs Organizational Approaches to Promote Person-Centered Care Environmental Approaches to Support Aging-Friendly Care HIV Prevention and Care for the Older Adult LGBTQ+ Perspectives Key Features: Best practices for in-patient, in-home, and long-term care settings Case studies with discussions in each chapter to illustrate application of clinical practice and related Nursing Standard of Practice Protocol The AGREE systematic method was used to evaluate each protocol and validate this book ' s content Instructor ' s resources including PowerPoints and a Test Bank Purchase includes digital access for use on most mobile devices and computers

Praise for the Third Edition: " The third edition of this outstanding resource reflects the many advances in the care of older people that have occurred since the publication of the second edition...The vast bulk of the content is accessible and relevant to an international audience. The indexing and cross-referencing are excellent... Score: 5/5 stars." -- Margaret Arthur, Nursing Standard "The information [in this book] is amazing. I reviewed topics in which I have expertise and was very satisfied. This is an excellent addition to my library and I will refer to it often, much like a medical dictionary... Score: 90, 4 Stars." --Doody's Medical Reviews " Provides 273 comprehensive, yet succinct, entries on a variety of topics related to elder care. In addition, many of the entries include see also references that help readers easily navigate the book. Recommended." --Choice: Current Reviews for Academic Libraries This expanded, one-of-a-kind reference of more than 250 entries provides a comprehensive guide to all of the essential elements of elder care across a breadth of health and social service disciplines. Responding to the needs of providers, directcare workers, family, and other caregivers, the diverse array of entries included in this encyclopedia recognize and address the complex medical, social, and psychological problems associated with geriatric care. In addition to a brief, accessible summary of each topic, entries include several key references, including web links and mobile apps for additional sources of information. This updated edition contains more than 30 new entries written by renowned experts that address a variety of elder care topics. New to the Fourth Edition: New entries addressing Ethics Consultation, Eye Disorders, Pain -- Acute and Chronic, and many others Key Features: Provides succinct descriptions of over 250 key topics for health and social service clinicians Offers crucial information for elder care providers across all settings and disciplines Distills current, evidence-based literature sources Written by nationally recognized expert researchers and clinicians Includes links to useful websites and mobile apps

The NICHE model demonstrates improved clinical outcomes, positive fiscal results, enhanced nursing competencies, community recognition, and greater patient, family, and staff satisfaction. This official guidebook to the NICHE model of care provides nurses with the knowledge and skills for delivering best practice in the care of older adults. Primarily hospital-based, NICHE currently has a network of over 600 national and international healthcare organizations. The NICHE model ensures that every adult age 65 and over receives care that promotes dignity, autonomy and function. Written by world-leading experts in gerontological nursing, this distinguished publication serves as the gold standard manual for nurses and all clinical care providers looking to provide optimal, evidence-based care to their older patients. As the leading nurse-driven program designed to address the complex needs of older adults, the NICHE model emphasizes the role of the nurse as a change agent and leader for effective program development, implementation of best practices, and formulation of healthcare policy. This model engages frontline practicing nurses and staff, providing the requisite knowledge and skills to work autonomously with full responsibility and authority in complex healthcare systems. Key Features Reflects the best practices of the over 600 NICHE hospitals Features multiple case studies and exemplars Uses an interprofessional approach to care Draws on leading gerontological nursing experts nationally and internationally Highly relevant to a global audience This publication also serves as the policy, planning and implementation companion to Evidence-Based Geriatric Nursing Protocols for Best Practice, edited by Marie Boltz, PhD, RN, GNP-BC, FGSA, FFAN et al

This book is designed to present the clinical geriatric trends within general internal medicine and family practice, which practitioners often encounter in caring for their older adult patients. Chapters focus on increasingly difficult clinical decisions that practitioners have to make in caring for older adults, who often experience medical complications due to memory loss, physical disability, and multiple chronic conditions. Written by experts in geriatric medicine, each of these chapters start with the most up-to-date clinical geriatric research and provide specific examples or case studies on how to use this information to address the clinical needs of older adult patients. In addition, there is a set of concise "take-home points " for each chapter that are easy to commit to memory and implement in clinical care of aging patients. As the only book to focus on current trends in geriatric research and evidence-based eldercare practice, Clinical Trends in Geriatric Medicine is of great value to internists, family practitioners, geriatricians, nurses, and physician assistants who care for older adults.

Handbook of Geriatric Assessment, Fifth Edition is a multidisciplinary text that takes a contemporary approach in line with patient and family centered care. With contributions from the foremost experts in the field, it contains the latest information on geriatric assessments for older adults. Completely updated and revised, the Fifth Edition includes several new chapters, including demographic trends, age friendly health systems, payment reform and impact, the VA health system, self-care and management, impact on familial relations, vulnerable populations, building geriatric interdisciplinary teams, advance care planning, caregiver information, spiritual assessment, senior hunger, and transitions of care.

This text analyses how acute and emergency care can be more efficient, featuring twenty case studies of successful innovations.
