Exploring Our World is a middle school program co-authored by National Geographic. This program introduces students to an enriched view of the interrelationships of geography, history, economics, government, citizenship, and current events in one compelling package. A strong geographic thread is interwoven with history, government, and current events to analyze different regions of the world and the issues they face. Suitable for a world geography or world cultures class, Exploring Our World is available as a full survey; Eastern Hemisphere; and Western Hemisphere, Europe, and Russia. Explore the interrelationships of geography, history, government, and more in one rich package. Includes: Print Student Edition

"A foldable is a 3-D, student-made, interactive graphic organizer based upon a skill. Making a foldable gives students a fast, kinesthetic activity that helps them organize and retain information ... Foldables can also be used for a more in-depth investigation of a concept, idea, opinion, event, or a person or place studied in a chapter."--p. 1.

Develop geographic literacy with the only high school geography text co-authored by the National Geographic. Help your students make the connection between geography and history, as well as geography and current events.

Physics is a branch of science that many people consider to be too complicated to understand. In this exciting addition to the ?Exploring? series, John Hudson Tiner puts this myth to rest as he explains the fascinating world of physics in a way that students from elementary to high school can comprehend. Did you know that a feather and a lump of lead will fall at the same rate in a vacuum? Learn about the history of physics from Aristotle to Galileo to Isaac Newton to the latest advances. Discover how the laws of motion and gravity affect everything from the normal activities of everyday life to launching rockets into space. Learn about the effects of inertia firsthand during fun and informative experiments. Exploring the World of Physics is a great tool for students of all ages who want to have a deeper understanding of the important and interesting ways that physics affects our lives and is complete with illustrations, chapter questions, and an index.
