What characteristics and values define a country? Which countries are particularly successful in terms of education, economics, or culture? In this book, Monocle provides a global perspective on the distinct qualities of nations. Monocle's books with Gestalten have shown you how to build a better life, business, and home. But now Monocle raises the bar: how do you run a great country? They are not talking about might, muscle, or nationalism --although you need a bit of a swagger every now and then. They are talking about a country that feels like a cohesive community, knows what to value, and goes out into the world to gently get its way with soft power, fine ambassadors, and compelling cultural offerings. At home, this country celebrates good education, well-made institutions, and its own people and their skills. *How to Run a Nation: A Monocle Guide* is a thought-provoking primer that informs and inspires. The best ideas don't need to be invented --they need to be found and copied. Let Monocle be your guide.

_____ As seen on Sky News All Out Politics ' There ' s no understanding global inequality without understanding its history. In *The Divide*, Jason Hickel brilliantly lays it out, layer upon layer, until you are left reeling with the outrage of it all. ' - Kate Raworth, author of *Doughnut Economics* . The richest eight people control more wealth than the poorest half of the world combined. . Today, 60 per cent of the world ' s population lives on less than \$5 a day. . Though global real GDP has nearly tripled since 1980, 1.1 billion more people are now living in poverty. For decades we have been told a story: that development is working, that poverty is a natural phenomenon and will be eradicated through aid by 2030. But just because it is a comforting tale doesn ' t make it true. Poor countries are poor because they are integrated into the global economic system on unequal terms, and aid only helps to hide this. Drawing on pioneering research and years of first-hand experience, *The Divide* tracks the evolution of global inequality – from the expeditions of Christopher Columbus to the present day – offering revelatory answers to some of humanity ' s greatest problems. It is a provocative, urgent and ultimately uplifting account of how the world works, and how it can change for the better.

Adam Smith's masterpiece, first published in 1776, is the foundation of modern economic thought and remains the single most important account of the rise of, and the principles behind, modern capitalism. Written in clear and incisive prose, *The Wealth of Nations* articulates the concepts indispensable to an understanding of contemporary society.

The bestselling author of *Battle Hymn of the Tiger Mother*, Yale Law School Professor Amy Chua offers a bold new prescription for reversing our foreign policy failures and overcoming our destructive political tribalism at home. Humans are tribal. We need to belong to groups. In many parts of the world, the group identities that matter most – the ones that people will kill and die for – are ethnic, religious, sectarian, or clan-based. But because America tends to see the world in terms of nation-states engaged in great ideological battles – Capitalism vs. Communism, Democracy vs. Authoritarianism, the “ Free World ” vs. the “ Axis of Evil ” – we are often spectacularly blind to the power of tribal politics. Time and again this blindness has undermined American foreign policy. In the Vietnam War, viewing the conflict through Cold War blinders, we never saw that most of Vietnam ' s “ capitalists ” were members of the hated Chinese minority. Every pro-free-market move we made helped turn the Vietnamese people against us. In Iraq, we were stunningly dismissive of the hatred between that country ' s Sunnis and Shias. If we want to get our foreign policy right – so as to not be perpetually caught off guard and fighting unwinnable wars – the United States has to come to grips with political tribalism abroad. Just as Washington ' s foreign policy establishment has been blind to the power of tribal politics outside the country, so too have American political elites been oblivious to the group identities that matter most to ordinary Americans – and that are tearing the United States apart. As the

stunning rise of Donald Trump laid bare, identity politics have seized both the American left and right in an especially dangerous, racially inflected way. In America today, every group feels threatened: whites and blacks, Latinos and Asians, men and women, liberals and conservatives, and so on. There is a pervasive sense of collective persecution and discrimination. On the left, this has given rise to increasingly radical and exclusionary rhetoric of privilege and cultural appropriation. On the right, it has fueled a disturbing rise in xenophobia and white nationalism. In characteristically persuasive style, Amy Chua argues that America must rediscover a national identity that transcends our political tribes. Enough false slogans of unity, which are just another form of divisiveness. It is time for a more difficult unity that acknowledges the reality of group differences and fights the deep inequities that divide us.

START-UP NATION addresses the trillion dollar question: How is it that Israel-- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the "Israel effect", there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

Lynn and Vanhanen argue that a significant part of the gap between rich and poor countries is due to differences in national intelligence (national IQs). Based on an extensive survey of national IQ tests, the results of their study challenge the previous theories of economic development and provide a new basis to evaluate the prospects of economic development throughout the world.

Thus what the "fair-trade" protectionist argument really comes down to is the nonsensical proposition that because foreign countries damage their consumers by foolish protectionist measures, equity demands the United States follow suit.
