DEUTZ 914 Series engines are 3 to 6-cylinder, naturally aspirated engines. The engine series is purely mechanical, and well known for its robust design and compatibility with high sulfur fuels. Individual cylinder and parts interchangeability within the 914 series reduces inventory and service costs.

The cylinder head forms the top of the engine's combustion chamber. Its integrated valve train components, inlet and exhaust ports play a vital role in controlling the engines charge cycle. Accurately cast and post-processed for perfect fit, DEUTZ cylinder heads ensure optimum flow of both combustion air and exhaust gas into and out of the engine's combustion chambers.
