The synchronizers are devices in the transmission that match the speed of the gears before allowing them to mesh. It's that downshift to second gear while going around the corners that seems to wear it out. Once the synchronizer is worn out, the transmission will grind when you try to engage that gear.

If you have a shifting problem with your Honda manual, check the clutch hydraulics for leaks, particularly the clutch master. These have been known to leak, and when they do they can cause shifting problems, usually grinding into gears. In addition to checking the hydraulics, check the shift linkage for worn bushings.
