Becoming an Archaeologist: A Guide to Professional Pathways is an engaging handbook on career paths in the area of archaeology. It outlines in straightforward fashion the entire process of getting a job in archaeology, including the various options; the training that is required; and how to get positions in the academic, commercial and government worlds. It also includes discussion of careers in related heritage professions such as museums and conservation societies. The book includes a series of interviews with real archaeologists, all young professionals who began their careers within the last ten years. These insider guides offer essential tips on how they got their first job and progressed in their careers. Written in an accessible style, the book is essential reading for anyone interested in the realities of archaeology in the 21st century.

An objective guide to this fascinating science of history and culture Archaeology continually makes headlines--from recent discoveries like the frozen Copper-Age man in the Italian Alps to the newest dating of the first people in America at over 14,000 years ago. Archaeology For Dummies offers a fascinating look at this intriguing field, taking readers on-site and revealing little-known details about some of the world's greatest archaeological discoveries.

Read PDF How To Do Archeology The Right Way

It explores how archaeology attempts to uncover the lives of our ancestors, examining historical dig sites around the world and explaining theories about ancient human societies. The guide also offers helpful information for readers who want to participate in an excavation themselves, as well as tips for getting the best training and where to look for jobs.

From the bestselling author of *1177 B.C.*, an accessible primer to the archaeologist's craft. An archaeologist with more than thirty seasons of excavation experience, Eric H. Cline has conducted fieldwork around the world, from Greece and Crete to Egypt, Israel, and Jordan. In *Digging Deeper*, Cline answers the questions archaeologists are most frequently asked, such as: How do you know where to dig? How are excavations actually done? How do you know how old something is? Who gets to keep what is found? How do you know what people from the past ate, wore, and looked like? Adapted from Cline's acclaimed book *Three Stones Make a Wall*, this lively little volume is brimming with insights and practical advice about how archaeology really works. Whether you are an armchair archaeologist or embarking on your first excavation, *Digging Deeper* is an essential primer on the art of the dig.

In this illustrated book, some of Israel's foremost archaeologists present a survey of early life in the land of the Bible, from the Neolithic era (eighth millennium BC) to the fall of Jerusalem and the destruction of the First Temple in 586 BC. Each chapter covers a particular era and includes a bibliography.

Archaeologists on a dig work very much like detectives at a crime scene. Every chipped rock, charred seed, or fossilized bone could be a clue to how people lived in the past. In this information-packed *Let's-Read-and-Find-Out Science* book, Kate Duke explains what scientists are looking for, how they find it, and what their finds reveal.

Covering archaeology from a range of angles, incorporating history, major themes, theories and methods, *Doing Archaeology* provides a firm grounding for anyone interested in learning more about the discipline. Throughout the book, key information is accessibly presented and important questions are answered, including: What is archaeology? How did archaeology begin? How can archaeology tell us about the past? How can archaeology tell how people use space and the landscape? How can we use the past to understand people? How do archaeology and 'heritage' interact? What role does archaeology play in society today? How do we practice archaeology? Drawing on the experiences of practising archaeologists, with engaging examples and studies from sites around the world, this book gives the reader a sense of what it is to study archaeology and be an archaeologist. An essential text for students studying A-Level archaeology, those considering or beginning a degree/foundation degree in archaeology, and those of all ages interested in volunteering or becoming involved in archaeological projects.

Did you know that we know so much about the previous occupants of Africa because of the clues they left behind? These clues have been unearthed by archaeologists. Instead of venturing on your own to learn more, use this book to gain knowledge on Africa's past civilizations. The visuals and layout used in this book will make it a refreshing read. How do we know so much about the past? Archaeologists dig it! Join Amanda the

Archaeologist as she travels around the world, learning about different people and cultures. From ancient Egypt to Medieval Europe, Emperor Qin's Terra-Cotta Army to Cycladic Figurines, or Cahokia to Pompeii, Amanda will teach you about the people, places, and things that shaped our world today! In *Can YOU Dig It? Archaeology Lost and Found in the Sands of Time*, Amanda will teach you all about how archaeologists discover the truth about our human past. Let your archaeologist explore excavations and see real artifacts from around the world and learn what archaeology is, how archaeologists excavate a site, and what we can learn by studying the material culture left behind by people in the past. With a whole world to explore, maybe your next question will be: "Where will she take us next?"

In 1922, Howard Carter peered into Tutankhamun's tomb for the first time, the only light coming from the candle in his outstretched hand. Urged to tell what he was seeing through the small opening he had cut in the door to the tomb, the Egyptologist famously replied, "I see wonderful things." Carter's fabulous discovery is just one of the many spellbinding stories told in *Three Stones Make a Wall*. Written by Eric Cline, an archaeologist with more than thirty seasons of excavation experience, *Three Stones Make a Wall* traces the history of archaeology from an amateur pursuit to the cutting-edge science it is today by taking the reader on a tour of major archaeological sites and discoveries, from Pompeii to Petra, Troy to the Terracotta Warriors, and Mycenae to Megiddo and Masada. Cline brings to life the personalities behind these digs, including Heinrich Schliemann, the former businessman who excavated Troy, and Mary Leakey, whose discoveries advanced our understanding of human origins. The discovery of the peoples and civilizations of the past is presented in vivid detail, from the Hittites and Minoans to the Inca, Aztec, and Moche. Along the way, the book addresses the questions archaeologists are asked most often: How do you know where to dig? How are excavations actually done? How do you know how old something is? Who gets to keep what is found? Taking readers from the pioneering digs of the eighteenth century to the exciting new discoveries being made today, *Three Stones Make a Wall* is a lively and essential introduction to the story of archaeology.
