### How To Make Hand Plane

Drill the holes for the dowells to make the assembly faster,  
easier and accurate. Use a stop block again to make sure they  
all get exactly the same dimension. Cut the pieces for the  
hole of the blade on exact angle, you better use a miter  
gauge and a stop block to made them all equal.

You Can Make Your Own Bodysurfing Handplane

The first step in construction is to mill your stock straight and square. Make sure your blank is at least 1-1/4" wider than your chosen blade, and 3" longer than the target length. For this project, the length of the plane is up to you. The extra width allows us to rip both cheeks from the center block.

Next I sculpted the body a bit more, tapering it towards the front and back, and smoothing and rounding it with a hand plane. I ended up tapering it quite a bit on the back. The way I normally hold the Kunz plane, my fingers are against the back of it. Tapering the back leaves more room. Now finally ready to glue in the tail. Again, I used epoxy.

---

Making a small hand plane (palm plane)

When working using a hand plane, you lift it from the piece of wood and place it back for the next forward stroke. You may blunt the plane ' s blade if you slide it in a backward direction without lifting it from the workpiece. Japanese hand planes are used in reverse. They ' re slightly lifted and
