For a more readable, engaging handbook, write simple, to-the-point summaries using a conversational and human tone. For some items, these summaries are sufficient. For many others, such as complicated legally-required policies, these summaries should serve as introductions to long-form, case-specific content. Case-specific.

Millions of people around the world are forced to work without pay and under threat of violence. These individuals can be found working in brothels, factories, mines, farm field, restaurants, construction sites and private homes: many have been tricked by human traffickers and lured by false promises of good jobs or education, some are forced to work at gunpoint, while others are trapped by phony debts from unscrupulous moneylenders. The SAGE Handbook of Human Trafficking and Modern-Day Slavery provides a comprehensive, interdisciplinary and global look at the diverse issues surrounding human trafficking and slavery in the post-1945 environment. Covering everything from history, literature and politics to economics, international law and geography, this Handbook is essential reading for academics and researchers, as well as for policy-makers and non-governmental organisations

The Routledge Handbook of International Human Rights Law provides the definitive global survey of the discipline of international human rights law. Each chapter is written by a leading expert and provides a contemporary overview of a significant area within the field. As well as covering topics integral to the theory and practice of international human rights law the volume offers a broader perspective through examinations of the ways in which human rights law interacts with other legal regimes and other international institutions, and by addressing the current and future challenges facing human rights. This highly topical collection of specially commissioned papers is split into four sections: The nature and evolution of international human rights law discussing the origins, theory and practice of the discipline. Interaction of human rights with other key regimes and bodies including the interaction of the discipline with international economic law, international humanitarian law, and development, as well as other legal regimes. Evolution and prospects of regional approaches to human rights discussing the systems of Europe, the Americas, Africa and South East Asia, and their relationship to the United Nations treaty bodies. Key contemporary challenges including non-State actors, religion and human rights, counter-terrorism, and enforcement and remedies. Providing up-to-date and authoritative articles covering key aspects of international human rights law, this book work is an essential work of reference for scholars, practitioners and students alike. Chapter 35 of this book is freely available as a downloadable Open Access PDF at www.routledgehandbooks.com. It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license.

United States by Robert Justin Goldstein.

Despite the appearance of political and military stability, Egypt may be standing at the edge of a precipice as the state remains grounded in rigid authoritarianism while the population, including a struggling civil society, readies itself to make the leap to democratization. This characterization has far-reaching implications for relations between citizens and the government, as well as Egypt's foreign affairs posture, particularly in the Middle East. State repression of civil, political, and religious actors; the ineffectual provision of social services; and two religious divides, between Coptic Christianity and Islam on the one hand, and secular and conservative Islamic traditions on the other, make for an incendiary domestic environment. The resulting over-reliance on security services to quash dissent could result in a population more amenable to less democratic methods of regime change and/or the

development of stronger linkages between regional Islamist groups, whether they be political, militant, or some combination thereof. Global Security Watch—Egypt explores the historical background that created the current realities in Egypt and examines the players and events influencing the nation today. It concludes with a series of recommendations for the Egyptian political establishment, and for the American government, in the belief that meaningful political and policy changes in Egypt can lead to an improvement in human rights, democracy, justice, stability, and security for Egypt, and an improved partnership between Egypt and the United States.

Motivation is that which moves us to action. Human motivation is thus a complex issue, as people are moved to action by both their evolved natures and by myriad familial, social and cultural influences. The Oxford Handbook of Human Motivation collects the top theorists and researchers of human motivation into a single volume, capturing the current state-of-the-art in this fast developing field. The book includes theoretical overviews from some of the best-known thinkers in this area, including chapters on Social Learning Theory, Control Theory, Self-determination theory, Terror Management theory, and the Promotion and Prevention perspective. Topical chapters appear on phenomena such as ego-depletion, flow, curiosity, implicit motives, and personal interests. A section specifically highlights goal research, including chapters on goal regulation, achievement goals, the dynamics of choice, unconscious goals and process versus outcome focus. Still other chapters focus on evolutionary and biological underpinnings of motivation, including chapters on cardiovascular dynamics, mood, and neuropsychology. Finally, chapters bring motivation down to earth in reviewing its impact within relationships, and in applied areas such as psychotherapy, work, education, sport, and physical activity. By providing reviews of the most advanced work by the very best scholars in this field, The Oxford Handbook of Human Motivation represents an invaluable resource for both researchers and practitioners, as well as any student of human nature.

This authoritative Research Handbook brings together leading international scholars and practitioners to provide in-depth analysis of some of the most hotly debated topics and issues concerning the interface of human rights and business. Offering critical insights on prominent strands of research within the field of business and human rights, this comprehensive Research Handbook examines key challenges and potential solutions in the field.

Trafficking in human beings (THB) has been described as modern slavery. It is a serious criminal activity that has significant ramifications for the human rights of the victims. It poses major challenges to the state, society and individual victims. THB is not a static given but a constantly changing concept depending on societal changes and opinions, economic situations and legal developments. THB occurs both transnationally and within countries. The complexity of THB is such that it requires a wide range of expertise fully to address the phenomenon. Edited by a team of leading international academics, the Routledge Handbook of Human Trafficking will provide an interdisciplinary introduction to THB. It is aimed at academics, students, research universities and non-governmental organisations, as well as policy makers. It will review THB through the lens of law, anthropology, social and political science and will address statistical, data protection issues and showcase the most effective research methods, analyse the various actors and stakeholders and the different types of exploitation of trafficked persons. It will critically highlight and analyse the most pressing current challenges posed by THB.
