Kingdom Animalia Part  
II Vertebrates; Using a  
Dichotomous Key

A dichotomous key can  
be used to easily identify  
unknown organisms.

The word dichotomous  
comes from two Greek  
words that together  
mean, "divided in two  
parts". A dichotomous  
key consists of a series of  
two-part statements that  
describe characteristics

world, such as trees, wildflowers, mammals, reptiles, rocks, and fish. Keys consist of a series of choices that lead the user to the correct name of a given item.

"Dichotomous" means "divided into two parts". Therefore, dichotomous keys always give two choices in each step.
