La lanterna magica è uno strumento di proiezione di immagini dipinte su una parete in una stanza buia, tramite una scatola chiusa contenente una candela, la cui luce è filtrata da un foro sul quale è applicata una lente. Il procedimento è del tutto analogo nella sostanza a quello di un moderno proiettore di diapositive. Si tratta del dispositivo del precinema più vicino allo spettacolo cinematografico vero e proprio.

Lanterne Magiche
A trenta aveva lasciato New York per il West, dove aveva investito del denaro nelle lanterne magiche e fatto il pioniere del cinema. A quarantotto era divenuto il più potente magnate di Hollywood, ancora volgare nel parlare, rapacemente amoroso, un lupo furioso che saccheggiava greggi indifesi di giovani stelline.

This collection of essays stems from the conference 'Nineteenth-Century Literature and Aesthetics', which was held at the University of Milan in 2006 and organised by the editors of this volume. The interface between word and image covered in these essays embraces the fields of literature, architecture, painting, photography, music and art criticism. The authors stress the role of aesthetics in a number of contexts ranging from the early 1830s to the fin de siècle and beyond, as far as the last influences of Victorian taste on the early years of the twentieth century. During the nineteenth century the ancient interaction between literature and aesthetics was challenged and criticised by Martineau, Rossetti, Ruskin, Pater, Wilde, Beardsley, Cameron and Carroll, among others: their awareness of the complexity of visual perception problematised the existing categories of realism, artistic conventions, discourse of description, translation and representation. The essays cover almost a century of debate between literature and aesthetics. They focus on the intersection of word and image by emphasising transgressions in art hierarchies, forms and languages, which restyle existing categories and project them into new aesthetic dimensions beyond the conventional idea of the sister arts.

As mobile communication, social media, wireless networks, and flexible user interfaces become prominent topics in the study of media and culture, the screen emerges as a critical research area. This reader brings together insightful and influential texts from a variety of sources—theorists, researchers, critics, inventors, and artists—that explore the screen as a fundamental element not only in popular culture but also in our very understanding of society and the world. The Screen Media Reader is a foundational resource for studying the screen and its cultural impact. Through key contemporary and historical texts addressing the screen's development and role in communications and the social sphere, it considers how the screen functions as an idea, an object, and an everyday experience. Reflecting a number of descriptive and analytical approaches, these essays illustrate the astonishing range and depth of the screen's introduction and application in multiple media configurations and contexts. Together they demonstrate the long-standing influence of the screen as a cultural concept and communication tool that extends well beyond contemporary debates over screen saturation and addiction.

Reading Popular Culture in Victorian Print: Belgravia and Sensationalism is a comprehensive study of the whole run of the monthly periodical Belgravia under the direction of Mary Elizabeth Braddon. It traces the material history of the magazine, its production and global distribution while at the same time placing its history and content in the context of Victorian popular culture and Victorian discursive formations. Among the questions Reading Popular Culture in Victorian Print investigates are the status of authors in the marketplace, the innovative place Belgravia holds in the history of print culture, the rhetoric of sensationalism in fiction, journalism and pre-cinema, the representation of trade with India, and the use of urban space as a branding strategy. It makes the claim that the periodical is the sensation novel of the 1860s.

The Divine Comedy of Dante Alighieri (1265–1321) is one of the seminal works of western literature. Its impact on modern culture has been enormous, nourishing a plethora of twentieth century authors from Joyce and Borges to Kenzaburo Os. Although Dante's influence in the literary sphere is well documented, very little has been written on his equally determining role in the evolution of the visual media unique to our times, namely, cinema and television. Dante, Cinema, and Television corrects this oversight. The essays, from a broad range of disciplines, cover the influence of the Divine Comedy from cinema's silent era on through to the era of sound and the advent of television, as well as its impact on specific directors, actors, and episodes, on national/regional cinema and television, and on genres. They also consider the different modes of appropriation by cinema and television. Dante, Cinema, and Television demonstrates the many subtle ways in which Dante's Divine Comedy has been given 'new life' by cinema and television, and underscores the tremendous extent of Dante's staying power in the modern world.

A cultural history of media that were "new media" in the eighteenth, nineteenth, and twentieth centuries.
