Maps out the performance contexts of the period, such as Irish “poor” theatre both reflecting and complicating narratives of Irish Identity under British Rule. The study investigates the melodramatic aesthetic within these contexts and goes on to analyse a selection of the melodramas by the playwrights J.W. Whitbread and P.J. Bourke. In doing so, the analyses makes plain the comic structures and intent that work across both character and action, foregrounding comic women at the centre of the discussion. Finally, the book applies a “practice as research” dimension to the study. Working through a series of workshops, rehearsals and a final performance, Colleary

Investigates comic identity and female performance through a feminist revisionist lens. She ultimately argues that the formulation of the Comic Everywoman as staged “Comic” identity can connect beyond the theatre to her “Everyday” self. This book is intended for those interested in theatre histories, comic women and in popular performance.

Design and carry out a practical evaluation that proves the value of my contribution?" Informatics is a multifaceted, interdisciplinary field with research that ranges from theoretical developments to projects that are highly applied and intended for near-term use in clinical settings. The implications of "proving" a research claim accordingly vary greatly depending on the details of an individual student's goals and thesis statement. Furthermore, the dissertation work leading up to an evaluation plan is often so time-consuming and arduous that attempting the "perfect" evaluation is frequently seen as impractical or as diverting students from central programming or implementation

Types that are their primary areas of interest. They often ask what compromises are possible so they can provide persuasive data in support of their claims without adding another two to three years to their graduate student life. Our students clearly needed help in dealing more effectively with such dilemmas, and it was therefore fortuitous when, in the autumn of 1991, we welcomed two superb visiting professors to our laboratories.

Is directed towards 'ground level' clinical staff, many of whom are, although they may not see it, clinical leaders in health care organisations. The book offers practical, research-based guidance and examples that will inspire, motivate, support and facilitate clinical leaders (or aspiring clinical leaders) in the application of clinical leadership skills. Written for health professionals who act principally in direct client/patient care, it describes the difference between leadership and management. It sets out a new theory of leadership: congruent leadership, primarily focused on how nurses and other health professionals lead at the bedside. Containing case studies and activities,
