Cover title: Macroeconomic models and policy."A Wiley/Hamilton publication." Includes bibliographies and index.

This is a collection of independent works on the GLOBUS model. A first and basic application of the GLOBUS model was made through the computation of its standard run for the years 1970-2010. Stated in the simplest possible terms GLOBUS is a computer simulation model of many important macropolitical and macroeconomic relationships within and among 25 prominent contemporary nations plus a rest-of-world entity. It is designed and used to explore possible solutions to long-term global problems.

Vols. 1-4 include material to June 1, 1929.
