Completion of the Security Supervisor Program is the initial step towards designation as a Certified Security Supervisor (CSS). This volume, written by 30 of the industry's leading security supervisors, authors, educators, and consultants is a complete source of training information for the aspiring security supervisor. It will improve knowledge about the diverse critical issues affecting today's security professional including personnel selection, quality control, outsourcing, etc. Written for the International Foundation for Protection Officers' Security Supervisor Program, this book will guide the security professional to a complete mastery of leadership skills. Serves as course text for the Certified Security Supervisor (CSS) program from International Foundation for Protection Officers. Includes the most up-to-date issues facing security supervisors such as cultural diversity, quality control, and professional ethics A complete training manual for security supervisors which covers skills essential to becoming an effective manager.

The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.
