Neonatal Encephalopathy and Neurologic Outcome: Amazon.co ...

Moreover, a more favorable neurodevelopmental outcome was observed in group I than in group II. This study suggests that characteristic white matter injury in neonatal encephalopathy may be related to decreased calcium levels induced by rotavirus, and may have a better neurodevelopmental prognosis than other causes. PMID: 29433417 [Indexed for MEDLINE]

Clinical Findings and Neurologic Outcome in Neonatal ...

Newly revised and updated, the new 2nd edition updates the science on neonatal encephalopathy. The new 2nd edition recommends a broad evaluation of

all potential contributing factors in every case on neonatal encephalopathy, including maternal medical history, obstetric and intrapartum factors, and placental pathology.

Neonatal Encephalopathy and Neurologic Outcome, 2nd ...

Neonatal encephalopathy (NE) occurs in 1 – 6/1000 live full-term births and carries a high risk for subsequent neurodevelopmental disabilities. 1 Long-term outcome is known to depend on the severity of the neonatal condition. 2 3 The term NE is now more often used than perinatal asphyxia (PA).

Long-term outcome after neonatal hypoxic-ischaemic ...

Neonatal encephalopathy (NE) is defined as a syndrome of disturbed neurological function in the earliest days of life in the term infant, manifested by difficulty with initiating and maintaining respiration, depression of tone and reflexes, sub normal level of consciousness and often seizures.

Brain injury in the term infant | BEBOP

Neonatal encephalopathy is a devastating cause of infant mortality and neurodevelopmental disability.^{1,2} Despite the therapeutic success of hypothermia, moderate to severely affected newborns continue to have a 30% – 70% risk of death or disability.^{3 – 6} A key to improving outcome is the identification of early biomarkers of brain injury that can be used to direct interventions, gauge treatment effects, and provide prognostic information for parental counseling.

Biomarkers of Brain Injury in Neonatal Encephalopathy ...

This is, to our knowledge, the largest published cohort describing childhood outcomes after neonatal encephalopathy (NE) in sub-Saharan Africa. Children with NE are at high-risk of multidomain neurodevelopmental impairment in a setting where access to supportive services are often lacking.

Early Childhood Outcomes After Neonatal Encephalopathy in ...

An abstract is unavailable.

Executive Summary: Neonatal Encephalopathy and Neurologic ...

Neonatal Encephalopathy and Neurologic Outcome to indicate that an array of developmental outcomes may arise after neonatal encephalopathy in addition to cerebral palsy. To determine the likelihood that an acute hypoxic – ischemia event that occurred within close temporal proximity to labor and delivery contributed to neonatal encephalopathy, it is recommended

STATEMENT OF ENDORSEMENT Neonatal Encephalopathy and ...

Neonatal encephalopathy is a clinically defined syndrome of disturbed neurologic function in the earliest days of life in an infant born at or beyond 35 weeks of gestation, manifested by a subnormal level of consciousness or seizures, and often accompanied by difficulty with initiating and maintaining respiration and depression of tone and reflexes.

Encephalopathy in neonates | Better Safer Care

Neonatal encephalopathy (NE) versus hypoxic-ischemic encephalopathy (HIE) In 1862 Little reported that cerebral palsy and other abnormal neurologic outcomes in newborns resulted from intrapartum hypoxia-ischemia that was frequently attributed to the inappropriate actions of midwives and obstetricians who delivered the affected children [12].
