New Holland TL90A Tractors, 5567787 5567787 08-140 Mordy, Poland

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack--but far more fun to discover, as all of these delightful stories make abundantly clear.

Total Tractor! is all about tractors--from exciting vintage tractors

and farming machines to the latest state-of-the-art John Deere. Galleries of colorful tractors of every kind and all their amazing attachments are interspersed with stunning images of tractors in action. There's a complete history of tractors from steam tractor to diesel, and many makes, such as Massey Ferguson, are shown in fascinating detail. Crazy contests such as tractor pulling are also featured. Total Tractor! is the must-read book for any child who is passionate about tractors.

Discover how the scientist Bruce Banner becomes the green giant known as the incredible Hulk! Ready-to-Read books offer children a world of possibilities at three different reading levels. Level 1: Starting to Read Simple stories, building vocabulary, basic sentences. Level 2: Reading Independently More-challenging stories, varied sentence structure, paragraphs and short chapters. Level 3: Reading Proficiently Complex stories, rich vocabulary, longer chapters.

The nature of ethics has been the subject of much controversy and argument in recent decades. Theological Ethics and Global Dynamics tackles these various debates, offering a wide-ranging, comprehensive, and provocative statement of the nature of theological ethics in global times. Offers an accessible, lively, and provocative statement of the nature of moral philosophy and theological ethics in contemporary times. Tackles various perspectives on debates about distinctly Christian ethics. Argues that we need to reframe the arena in which moral questions are asked. Engages a range of positions, exploring distinctively modern issues such as moral and cultural relativism, globalization, problems of consumption and violence, and religious pluralism. Addresses the complexity of certain ethical decisions, which are difficult and far from clear-cut, and yet presents an ethical understanding which is both humane and deeply religious.

The definitive visual history of the tractor The complete history of farm machinery, from steam and vintage tractors to the latest combine harvesters is showcased in this lavishly illustrated volume. Packed with images and tractor data on more than 200 iconic machines, The Tractor Book explores the entire range of tractors and farming machines from around the world, such as Fordson Model F and Massey-Harris GP. Histories of famous marques, such as John Deere and Massey Ferguson, sit alongside immersive visual tours of celebrated machines. The Tractor Book covers how tractors work, their history, major marques and catalogues tractors from every era making this a must-have for anyone fascinated by these extraordinary machines.

A Straightforward Text Summarizing All Aspects of Process Control  
Textile manufacturing is one of the largest industries in the world, second only to agriculture. Spinning covers a prominent segment in textile manufacturing, and this budding industry continues to thrive and grow. Process Management in Spinning considers aspect of process management, and offers insight into the process control procedures and methods of spinning. Focusing on the technology as well as the management of the process, it examines both the economic and technological advancements currently taking place in the spinning industry. This text takes a close look at the advancing technology in manufacturing and process, and product quality control. It provides a basic overview of the subject, and also presents applications of this technology for practicing engineers. Incorporates Industry-Based, Real-World Examples The book contains 15 chapters that specifically address the stages of process control, energy management methods, humidification and ventilation systems basics, pollution management, process management tools, productivity, waste control, material handling, and other aspects of spinning mills. It also includes real-time case studies involving typical problems that arise in spinning processes and strategies used to contain them. The author provides a broad outlook on various topics including mixing, winding, raw material and optimizing raw material properties, bale management, yarn engineering systems, processing, and process management systems. He also details the defects associated with each and every process with causes, effects, and control measures. The book addresses process management as it relates to productivity, quality, and costs, as well as process control as it relates to man, machine, and material. Provides the scientific method for optimization/optimizing the properties of the fibers Familiarizes the reader with remedial measures to enhance the quality of the product Addresses productivity measurement and its role in controlling the cost of the manufacturing process Contains detailed examples, as well as linear programming and optimization techniques, and statistical applications Covers the areas of process control methods in spinning, defect analysis and rectification, improving productivity and quality, and using statistical tools Process Management in Spinning establishes the various process management measures required to help improve the process efficiency in spinning mills and the textile industry overall. Aimed at professionals in the textile industry, this text is a perfect resource for textile engineers/technologists/manufacturers, spin quality control engineers, spin quality assurance personnel, and other industry professionals.

Every year, thousands of people across the UK train to be a life, business or executive coach, yet many struggle to make a living. If they don't have the skills to run a successful business, they won't be able to create the business they need. In this book, you will discover 10 easy-to-follow steps to create your own successful business.
