"The topic is important and neglected and has major implications for the types of industrial policy that make any sense in transition countries. The clear message of this book is that protective science and technology policies would, for the most part, be a total waste of money. What is needed now is internationalization and a demand-driven approach, exactly the opposite of the former nationally based and supply-led systems existing under socialism." - Paul Hare, Heriot-Watt University Edinburgh, UK "Here is a book that goes beyond the abstractions and platitudes of conventional "transition economics" to look at what is really happening on the ground in the post-socialist countries of Eastern Europe. . . . The Globalization of Industry and Innovation in Eastern Europe presents a provocative but richly documented assessment of the central dynamic issues facing the East European economies today." - David Dyker, SPRU - Science and Technology Policy Research, University of Sussex, UK In this important book, industrial and enterprise reform over the last decade in Eastern Europe is critically reviewed in light of increasing Eastern integration into the global economy. The authors argue for the further globalization of Eastern European enterprise networks as a condition for recovery and growth in the region. Empirical evidence is provided from five industrial sectors (car industry, telecommunication, shipbuilding, computers, software), including case studies and international comparisons.

Global Strategy: Competing in the Connected Economy details how firms enter, compete and grow in foreign markets. Jain moves away from the traditional focus on developed countries and their multinational enterprises, instead focusing on both developed and emerging economies, as well as their interaction in an increasingly connected world. As the current global business environment is increasingly shaped—and connected—by faster technological developments, geopolitical forces, emerging economies, and new multinationals from those economies, this highly charged dynamic provides rich opportunity to revisit mainstream paradigms in globalization, innovation, and global strategy. The book rises to the challenge, exploring new competitive phenomena, new business models, and new strategies. Rich illustrations, real-world examples, and case data, provide students and executives with the insights necessary to connect, compete, and grow in a globalized business environment. This bold book succinctly covers strategy models and implementation for a range of global players, providing students of strategy and international business with a rich understanding of the contemporary business environment. For access to additional materials, including Powerpoint slides, a list of suggested cases, and sample syllabus, please contact Vinod Jain (vinod.jain01@yahoo.com).
