Liu has written a comprehensive text on Web mining, which consists of two parts. The first part covers the data mining and machine learning foundations, where all the essential concepts and algorithms of data mining and machine learning are presented. The second part covers the key topics of Web mining, where Web crawling, search, social network analysis, structured data extraction, information integration, opinion mining and sentiment analysis, Web usage mining, query log mining, computational advertising, and recommender systems are all treated both in breadth and in depth. His book thus brings all the related concepts and algorithms together to form an authoritative and coherent text. The book offers a rich blend of theory and practice. It is suitable for students, researchers and practitioners interested in Web mining and data mining both as a learning text and as a reference book. Professors can readily use it for classes on data mining, Web mining, and text mining. Additional teaching materials such as lecture slides, datasets, and implemented algorithms are available online.

This book constitutes the thoroughly refereed post-proceedings of the First International Workshop on Topic Map Research and Applications, held in October 2005. The 17 revised full papers and five revised short papers presented together with one invited lecture were carefully selected during two rounds of reviewing and improvement from more than 35 submissions. One of the goals of the workshop is to survey and structure the field of topic map research and the emerging topic map technologies.

Inclusive businesses are commercially viable business models that provide in-scale innovative and systemic solutions to problems relevant to the lives of low-income people. Inclusive business companies often involve women in their value chain and provide specific services that help low-income women. This report assesses the extent to which inclusive business models promote women's economic empowerment. Examples come from the inclusive business portfolios of Asian Development Bank, Inter-American Development Bank and International Finance Corporation. The report finds that inclusive businesses are indeed bringing positive change to women's lives and that addressing gender-based constraints also yields business

benefits. However, a company's financial return and its social impact can be maximized only if companies understand and address systemic issues of gender inequality.

The topics of climate change, weather prediction, atmospheric sciences and other related fields are gaining increased attention due to the possible impacts of changes in climate and weather upon the planet. Concurrently, the increasing ability to computationally model the governing partial differential equations that describe these various topics of climate has gained a great deal of attention as well. In the current book, several aspects of these topics are examined to provide another stepping stone in recent advances in the fields of study and also focal points of endeavor in the evolving technology.

Sourcebook contains End-of-the-Unit Assessment Tasks for each Curriculum Unit along with suggestions of what the teacher should look for when evaluating student work.* Contains both English and Spanish blackline masters.
