What Is the Difference Between Planning & Scheduling ...

Production planning plays an important role for any successful business, but it ' s hard to find a case where planning or scheduling would have as great an impact as with manufacturing companies, where bad production planning might be a beginning of a disaster or proper planning may be a strong competitive advantage. As Benjamin Franklin once said: ...

The Importance of Proper Production Planning in ...

Planning is what happens when a company maps out a path to achieve a result. When it comes to manufacturing, for example, sales and operations should both be involved in the planning for upcoming demand. Or a series of large orders can be planned for across all levels of a company, from sales to finance.

What is the Difference between Planning and Scheduling ...

In manufacturing, the purpose of scheduling is to minimize the production time and costs, by telling a production facility when to make, with which staff, and on which equipment. But it's an academic purpose. From a business point of view, the first priority purpose is to keep the customer's due date.
