examination of undercover work in Chicago, Los Angeles, New York, and Philadelphia as well as Washington, D.C., Detroit, New Haven, Baltimore, and Birmingham, Donner reveals the underside of American law enforcement.

The Uses of Photography examines a network of artists who were active in Southern California between the late 1960s and early 1980s and whose experiments with photography opened the medium to a profusion of new strategies and subjects. These artists introduced urgent social issues and themes of everyday life into the seemingly neutral territory of conceptual art, through photographic works that took on hybrid forms, from

Online Library Protectors Of Privilege Red Squads

books and postcards to video and text-and-image installations. Tracing a crucial history of photoconceptual practice, *The Uses of Photography* focuses on an artistic community that formed in and around the young University of California San Diego, founded in 1960, and its visual arts department, founded in 1967. Artists such as Eleanor Antin, Allan Kaprow, Fred Lonidier, Martha Rosler, Allan Sekula, and Carrie Mae Weems employed photography and its expanded forms as a means to dismantle modernist autonomy, to contest notions of photographic truth, and to engage in political critique. The work of these artists shaped emergent accounts of postmodernism in the visual arts and their influence is felt throughout the global contemporary art world today. Contributors include

Radical glossary of the vocabulary of
policing that redefines the very way we
understand law enforcement It doesn't
take firsthand experience to learn the
meaning of pain compliance or rough
ride. *Police: A Field Guide* is an
illustrated handbook to the methods,
mythologies, and history that animate
today's police. It is a survival manual
for encounters with cops and police
logic, whether it arrives in the shape of
officer friendly, Tasers, curfews, non-
compliance, or reformist discourses
about so-called bad apples. In a series

Online Library Protectors Of Privilege Red Squads

of short chapters, each focusing on a single term, such as the beat, order, badge, throw-down weapon, and much more, authors David Correia and Tyler Wall present a guide that reinvents and demystifies the language of policing in order to better prepare activists—and anyone with an open mind—on one of the key issues of our time: police brutality. In doing so, they begin to chart a future free of this violence—and of police.

Let's begin with the basics: violence is an inherent part of policing. The police represent the most direct means by which the state imposes its will on the citizenry. They are armed, trained, and authorized to use force. Like the possibility of arrest, the threat of violence is implicit in every police encounter. Violence, as well as the

Online Library Protectors Of Privilege Red Squads

law, is what they represent. Using media reports alone, the Cato Institute's last annual study listed nearly seven thousand victims of police "misconduct" in the United States. But such stories of police brutality only scratch the surface of a national epidemic. Every year, tens of thousands are framed, blackmailed, beaten, sexually assaulted, or killed by cops. Hundreds of millions of dollars are spent on civil judgments and settlements annually. Individual lives, families, and communities are destroyed. In this extensively revised and updated edition of his seminal study of policing in the United States, Kristian Williams shows that police brutality isn't an anomaly, but is built into the very meaning of law enforcement in the United States. From antebellum slave patrols to

Online Library Protectors Of Privilege Red Squads

today's unarmed youth being gunned down in the streets, "peace keepers" have always used force to shape behavior, repress dissent, and defend the powerful. *Our Enemies in Blue* is a well-researched page-turner that both makes historical sense of this legalized social pathology and maps out possible alternatives. Kristian Williams is the author of several books, including *American Methods: Torture and the Logic of Domination*. He co-edited *Life During Wartime: Resisting Counterinsurgency*, and lives in Portland, Oregon.

Anti-communism has long been a potent force in American politics, capable of gripping both government and popular attention. Nowhere is this more evident than the two great 'red scares' of 1919-20 and 1946-54; the

Online Library Protectors Of Privilege Red Squads

latter generally - if somewhat inaccurately - termed McCarthyism. The interlude between these two major scares has tended to garner less attention, but as this volume makes clear, the lingering effects of 1919-20 and the gathering storm-clouds of 'McCarthyism' were clearly visible throughout the 20s and 30s, even if in a more low-key way. Indeed, the period between the two great red scares was marked by frequent instances of political repression, often justified on anti-communist grounds, at local, state and federal levels. Yet these events have been curiously neglected in the history of American political repression and anti-communism, perhaps because much of the material deals with events scattered in time and space which never reached the intensity of the two

Online Library Protectors Of Privilege Red Squads

great scares. By focusing on this twenty-five year 'interim' period, the essays in this collection bridge the gap between the two high-profile 'red scares' thus offering a much more contextualised and fluid narrative for American anti-communism. In so doing the rationale and motivations for the 'red scares' can be seen as part of an evolving political landscape, rather than as isolated bouts of hysteria exploding onto - and then vanishing from - the political scene. Instead, a much more nuanced appreciation of the conflicting interests and fears of government, politicians, organised labour, free-speech advocates, employers, and the press is offered, which will be of interest to anyone wishing to better understand the political history of modern America.

Building a Just and Secure World highlights women's activism, often peripheral and one-dimensional in peace movement historiography which tends to dramatize men's antiwar and antinuclear activism in national organizations. In Chicago, an urban center of anti-war and civil rights activism, a generation of middle-aged women leaders came to their involvement in the movement through previous experience in mixed-sex Leftist movements and local civil rights campaigns. Participant historians of

Online Library Protectors Of Privilege Red Squads

Sixties New Left, peace, and feminist movements of the Sixties have argued that the Old Left was defunct and the younger generation re-energized socialism in the early 1960s. These historians characterized Popular Front leftists as anticommunist cold war liberals who had abandoned youthful revolutionary aspirations for the reformist New Deal welfare state. Contrary to the arguments the Popular Front politics were defunct, Schneidhorst joins historians who argue the Popular Front generation continued to promote progressive and radical goals into the 1960s.

The anticommunist crusade of the Federal Bureau of Investigation did not start with the Cold War. Based on research in the early files of the FBI's predecessor, the Bureau of

Online Library Protectors Of Privilege Red Squads

Investigation, the author describes how the federal security officials played a decisive role in bringing about the first anticommunist hysteria in the US, the Red Scare in 1919 to 1920. The Bureau's political role, it is argued, originated in the attempt by the modern federal state during the early decades of the 20th century to regulate and control any organised opposition to the political, economic and social order.
