This book will be a great addition to your homeopathic library. Once you've been using homeopathics for a while, and begin to work on a deeper level with them, you'll wonder which (for instance) liver remedy is really the one you need, when there are several which might be right. This book is the book that gives the particular spiritual/psychological picture of the remedies that will let you decide. With an unbelievable insight in some 300 homeopathic medicines Didier Grandgeorge gives us in a nutshell the essence (the spirit) of these remedies.

Drawing on fifty years of experience caring for children and adults, Dr. Moskowitz examines vaccines and our current policy regarding them. Weaving together a tapestry of observed facts, clinical and basic science research, news reports from the media, and actual cases from his own practice, he offers a systematic review of the subject as a whole. He provides scientific evidence for his clinical impression that the vaccination process, by its very nature, imposes substantial risks of disease, injury, and death that have been persistently denied and covered up by manufacturers, the CDC, and the coterie of doctors who speak for it. With the aim of acknowledging these risks, taking them seriously, understanding them more holistically, and ultimately assessing them on a deeper level, he proposes a nationwide debate based on objective scientific research, including what we already know and what still needs to be investigated in the future. He argues that

with no serious public health emergency to justify them, requiring vaccines of everyone deprives us all of genuinely informed consent, and prevents parents from making health-care decisions for our children, basic human rights that we still profess to hold dear. For the present, given the legitimate controversy surrounding the mandates, he proposes that most vaccines simply be made optional and that further research into their risks and benefits be conducted by an independent agency in the public interest, untainted by industry funding, CDC sponsorship, and the quasi-religious sanctimony that is widely invoked on their behalf.

A review and explanation of the ten miasma used in homeopathy.

Have you ever wondered why the same pattern in your life repeats again and again though you try to change it? Or why an emotion, thought or feeling occurs within you, out of proportion to the circumstance that “triggered” it? Ever felt “beside yourself” or “not yourself” during stressful situations, when it seems almost as if another you emerges? What is it? If you are searching for an answer, this book is the one to read. Dr. Rajan Sankaran, an internationally renowned homoeopath, author, teacher, and innovator has delivered profound insights on the inner human experience. These insights have revolutionized homeopathic practice all over the world and are also universally applicable and highly valuable to any one who is seeking answers to these questions. Stress does not come from external reality but how each one of us experiences it. And we each experience it in a different, completely unique way. When we probe deeper and deeper into our own experience of stress, we traverse different levels of experience of the world, and all that is temporary fades as a level is reached of a constant inner pattern in our lives which underlies all of our experience. This pattern reveals itself as a pure sensation of the being, which is felt in both the mind as well as the body at the same time and eventually expressing in clinically recognisable disease. This pattern or sensation reveals itself as a pattern or energy of something in nature “ a plant, an animal or a mineral. Along with our natural human song, another song plays within each of us. This other song drives our emotions, dreams, ambitions, work, relationships, illnesses and even our circumstances. In this book Dr. Sankaran guides us into a world of discovery of the inner world of our experience, where we can go beyond the story, the emotions, the situation, and discern the essence of something in nature, which is often concealed within the human expressions. By paying attention to hand gestures or doodles, unconscious paths of expression of the energy, you can perceive more and more the other song, the song that is causing stress or dis-ease. Awareness of this song’s theme is the beginning of healing

Enter the mysterious inner world of the Bird Kingdom via the powerful process of homeopathic provings. Homeopathic remedies taken from 15 different individual birds are elucidated as to their key features, symbolism, natural history and prominent rubrics, allowing homeopathic practitioners to quickly and easily identify them. Cases and previously unpublished provings of the newer remedies are included. Remedy characteristics of the bird family as a whole are also brought to life, making quick identification of this class possible.
