After performing an oil change, the BMW E46 oil service / inspection light must be reset. Once reset, the computer will then count down from 15,000 miles until the next oil change. The below procedure works on every BMW E46 model produced from 9/99 onward. The reset procedure is straightforward and does not require any special tools or even for the vehicle to be brought to a dealer.

[How to reset E46 oil service / inspection light ...](#)

An even simpler way to clear the engine management light is to turn the ignition on and off. This approach achieves the same outcome as the previous step, but without disconnecting the battery. Turn the ignition on and off three times, pausing a second between each cycle. The engine management light should go off. If it doesn't, consult a mechanic.
