teaching and learning
over a unit of work. In
recording the teaching
and learning
experiences in their
classrooms, the author
highlights how the two
teachers adopted
different approaches,
drawing on their
particular beliefs and
knowledge, to support
student learning in
science in ways that

were appropriate to their contexts as well as reflected their different experiences, strengths and backgrounds.

Through sharing their stories, this book illustrates, that due to the complex nature of teaching and learning, there is no one way of defining effectiveness.

In documenting this research, it is hoped that
