When thinking of New Mexico, few Americans think spy-vs.-spy intrigue, but in fact, to many international intelligence operatives, the state's name is nearly synonymous with espionage, and Santa Fe is a sacred site. The KGB's single greatest intelligence and counterintelligence coups, and the planning of the organization's most infamous assassination, all took place within one mile of Bishop Lamy's statue in front of Saint Francis Cathedral in central Santa Fe. In this fascinating guide, former CIA agent E. B. Held uses declassified documents from both the CIA and KGB, as well as secondary sources, to trace some of the most notorious spying events in United States history. His work guides modern visitors through the history of such events as the plot to assassinate Leon Trotsky, Ted Hall's delivery of technical details of the atom bomb to the KGB, and the controversial allegations regarding Los Alamos National Laboratory scientist Dr. Wen Ho Lee's contacts with China. Held provides background material as well as modern site locations to allow Cold War enthusiasts the opportunity to explore in a whole new way the settings for these historical events.

The Evolution of Washington, DC is a striking volume featuring select pieces of the extraordinary collection of Washingtoniana donated by Albert H. Small to the George Washington University in 2011. It showcases treasures such as an 1860 lithograph of the equestrian statue of Andrew Jackson in front of the White House and a contemporary print of old Potomac River steamboats. Other unique pieces include early designs for the White House, the Capitol, and the Washington Monument as well as presidential portraits and Civil War memorabilia. Each object--from architectural plans and topographical maps to letters and advertisements--tells a fascinating story, and together they illustrate the history of our nation's capital and indeed our nation itself.
