Josh Malerman's debut novel BIRD BOX is a terrifying psychological thriller that will haunt you long after reading. Most people dismissed the reports on the news. But they became too frequent; they became too real. And soon it was happening to people we knew. Then the Internet died. The televisions and radios went silent. The phones stopped ringing And we couldn't look outside anymore.

The three volume set LNCS 3610, LNCS 3611, and LNCS 3612 constitutes the refereed proceedings of the First International Conference on Natural Computation, ICNC 2005, held in Changsha, China, in August 2005 jointly with the Second International Conference on Fuzzy Systems and Knowledge Discovery FSKD 2005 (LNAI volumes 3613 and 3614).The program committee selected 313 carefully revised full papers and 189 short papers for presentation in three volumes from 1887 submissions. The first volume includes all the contributions related to learning algorithms and architectures in neural networks, neurodynamics, statistical neural network models and support vector machines, and other topics in neural network models; cognitive science, neuroscience informatics, bioinformatics, and bio-medical engineering, and neural network applications as communications and computer networks, expert system and informatics, and financial engineering. The second volume concentrates on neural network applications such as pattern recognition and diagnostics, robotics and intelligent control, signal processing and multi-media, and other neural network applications; evolutionary learning, artificial immune systems, evolutionary theory, membrane, molecular, DNA computing, and ant colony systems. The third volume deals with evolutionary methodology, quantum computing, swarm intelligence and intelligent agents; natural computation applications as bioinformatics and bio-medical engineering, robotics and intelligent control, and other applications of natural computation, and fuzzy neural systems as well as soft computing.

In the “fast-paced, frightening” (The New York Times Book Review) sequel to Bird Box, the inspiration for the record-breaking Netflix film starring Sandra Bullock, bestselling author Josh Malerman brings unseen horrors to life. **NOMINATED FOR THE BRAM STOKER AWARD** • “Malorie is even more of a psychological thriller than Bird Box, and all the scarier for it.”—The Wall Street Journal Twelve years after Malorie and her children rowed up the river to safety, a blindfold is still the only thing that stands between sanity and madness. One glimpse of the creatures that stalk the world will drive a person to unspeakable violence. There remains no explanation. No solution. All Malorie can do is survive—and impart her fierce will to do so on her children. Don't get lazy, she tells them. Don't take off your blindfold. **AND DON'T LOOK.** But then comes what feels like impossible news. And with it, the first time Malorie has allowed herself to hope. Someone very dear to her, someone she believed dead, may be alive. Malorie has already lost so much: her sister, a house full of people who meant everything, and any chance at an ordinary life. But getting her life back means returning to a world full of unknowable horrors—and risking the lives of her children again. Because the creatures are not the only thing Malorie fears: There are the people who claim to have caught and experimented on the creatures. Murmurers of monstrous inventions and dangerous new ideas. And rumors that the creatures themselves have changed into something even more frightening. Malorie has a harrowing choice to make: to live by the rules of survival that have served her so well, or to venture into the darkness and reach for hope once more.

Diagnostic methods using residuals; Assessment of influence; Alternative approaches to influence; Assessment of influence in other problems.

As I found my best outlet through words, my internal monologue. Here is a piece of me to you, I hope this touches you in ways only you'll understand.

Vols. for 1970-71 includes manufacturers' catalogs.

The Harmony Search Algorithm (HSA) is one of the most well-known techniques in the field of soft computing, an important paradigm in the science and engineering community. This volume, the proceedings of the 2nd International Conference on Harmony Search Algorithm 2015 (ICHSA 2015), brings together contributions describing the latest developments in the field of soft computing with a special focus on HSA techniques. It includes coverage of new methods that have potentially immense application in various fields. Contributed articles cover aspects of the following topics related to the Harmony Search Algorithm: analytical studies; improved, hybrid and multi-objective variants; parameter tuning; and large-scale applications. The book also contains papers discussing recent advances on the following topics: genetic algorithms; evolutionary strategies; the firefly algorithm and cuckoo search; particle swarm optimization and ant colony optimization; simulated annealing; and local search techniques. This book offers a valuable snapshot of the current status of the Harmony Search Algorithm and related techniques, and will be a useful reference for practising researchers and advanced students in computer science and engineering.

This 17-volume set LNCS 4550-4566 constitutes the refereed proceedings of the 12th International Conference on Human-Computer Interaction, HCII 2007, and of all the associated symposia and conferences during the event in Beijing, China, in July 2007. The 1695 revised papers presented in the 17 volumes were carefully reviewed and selected from a total of over 3400 submissions. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The conference objective is to provide an international forum for the dissemination and exchange of up-to-date scientific information on theoretical, generic and applied areas of Human-Computer Interaction (HCI), Universal Access, Engineering Psychology, Cognitive Ergonomics, Virtual Reality, Usability, Internationalization, Online Communities, Social Computing, Augmented Cognition and Digital Human Modeling. Springer also produced, for exclusive distribution to conference participants, a DVD version of the HCII 2007 proceedings. This DVD was released with ISBN 978-3-540-73736-4 and included, in addition to the proceedings papers, the extended abstracts of the posters presented during the HCII 2007 conference. The DVD is not available for purchase.
