The Mayr program, developed by the Austrian physician Dr. Franz Xaver Mayr (1875-1965), is an intensive regime lasting several weeks. It includes therapeutic fasts to rest the digestive tract, and it features a special diet to train proper mastication. This diet program is complemented with abdominal massage, hydrotherapy, and exercise. By following the F. X. Mayr method, patients can rejuvenate their dietary system and eliminate a whole host of ailments—from aches and pains, to depression, fatigue, and serious cardiac disorders. At the same time, they can reduce weight, improve their skin, and boost their sense of well-being. The author Dr. Erich Rauch was a personal student of Dr. F. X. Mayr. Over decades he supervised more than 40,000 Mayr therapies. For the practitioner as well as the patient in the clinic, his in-depth guide is the leading authority on the F. X. Mayr method. As a companion book it provides effective support for each stage of this successful therapy.

Presents a clinically tested fourteen-day plan designed to help establish acid-alkaline balance in the body, lose weight, and discover a healthier approach to eating in general, including daily menus and more than forty recipes.

Nutrition concerns us all. We eat several times a day for our entire lives. One would think that this makes us all experts in nutrition, yet it is difficult to agree on a common explanation what constitutes healthy nutrition. Many experts recommend completely different measures; new diets are constantly being invented, sometimes contradicting each other. This creates great uncertainty. All we can agree upon is that food is the key for us to stay healthy or move toward sickness. This guide offers reliable answers and leads you through the labyrinth of conflicting nutritional recommendations by focusing solely on the important basics, to enable you to develop an individual and healthy form of nutrition - according to your own preferences, taste and social environment. In this book you will learn, among other things, why acids can make you sick and fat does not automatically make you fat; why the old nutrition pyramid is no longer valid and why cholesterol is also a "stress molecule", which we do not need to immediately fight with medication.

Sooner or later, it happens to everyone: getting older. Some do it gracefully, others less so, but no one is immune to wrinkles and grey hair creeping up, seemingly overnight. And once they're there, they're hard to shift. Helena Frith Powell, fashion and lifestyle journalist extraordinaire, didn't even want to think about surrender. Surely, something could be done about advancing age? Armed with potions, lotions and pills (as well as resorting to a few much more extreme measures), she sets out to investigate any and all anti-aging tricks out there. From green tea and botox to yoga and exfoliating masks, To Hell in High Heels is the hilariously funny tale of one woman taking on the body clock, giving you a tried-and-tested survival guide for that ill-fated moment when the first wrinkle dares show its face.
