Herstein's Topics is the clearest, most naturally motivated exposition of abstract algebra. At any point in the text, the reader can sense the careful development of the whole. The exercises aren't a grad student's hodgepodge or filter that satisfies the publisher's urging to justify the latest edition.

I wonder if all the reviews I see are of "Topics in Algebra", 2nd ed. or "Abstract Algebra", 3rd ed. The second book is a good undergraduate introduction. However, Topics could be use at the graduate level. I. N. Herstein was a great authority and his writing has unusual clarity.

These solutions are meant to facilitate deeper understanding of the book, Topics in Algebra, second edition, written by I.N. Herstein. We have tried to stick with the notations developed in the book as far as possible. But some notations are extremely ambiguous, so to avoid confusion, we resorted to alternate commonly used notations.
