First published in 1998, this book describes the surviving medieval remains there and the far more numerous manor houses and castles owned by the bishops, as well as their London houses. Apart from royal residences these are far the largest group of medieval domestic buildings of a single type that we have. The author describes how these buildings relate

to the way of life of the bishops in relation to their duties and their income and how in particular the dramatic social changes of the later middle ages influenced their form. The work of the great bishop castle-builders of the 12th century is discussed, as are the general history of the medieval house with its early influence from the Continent, the changes in style of hall and chamber (still controversial) and its climax in the great courtyard houses of Cardinal Wolsey, Archbishop of York. The book includes over a hundred plans, sections and photographs of the surviving parts of bishops' residences, with a survey of 1647 of the Archbishop's palace at Canterbury before demolition.

Designed to dominate the surrounding area, to house powerful garrisons, offer sumptuous quarters for local nobility, and to discourage and repel enemy attacks, castles dominated England and Wales for more than half a millennium. Though some were built before 1066, the Norman Conquest left a lasting legacy in the form of fortifications ranging from small earthworks now barely discernible, to mighty and dominating stone fortresses. This book examines why castles were so essential to medieval warfare, their importance in domestic politics, and the day-to-day lives of those who lived and worked within them. It also shows how the development of new

technologies affected their construction and design, and why they eventually fell into disrepair in the late Middle Ages. Beautifully illustrated with stunning photographs, this is the perfect guide for any castle enthusiast seeking to discover more about medieval fortifications and their inhabitants.
